Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate forms of information technology. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: Under Sections 202(a) and 202(k) of the Clean Air Act (42 U.S.C. 7521), EPA finalized regulations to set more stringent vehicle emission standards beginning in model year 2017, as part of a systems approach to addressing the impacts of motor vehicles and fuels on air quality and public health. The Tier 3 vehicle emission standards, which are the subject of this ICR, reduce both tailpipe and evaporative emissions from passenger cars, light-duty trucks, medium-duty passenger vehicles, and some heavy-duty vehicles. The Tier 3 vehicle standards are harmonized with California's Low Emission Vehicle Program—LEVIII standards, creating a federal vehicle emissions program allowing automakers to sell the same vehicles in all 50 states. This ICR covers the information that affected respondents must provide to the Agency. Any information submitted to the Agency for which a claim of confidentiality is made is safeguarded according to policies set forth in CFR title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2).

Respondent’s obligation to respond:
The respondent’s obligation to respond is voluntary, but respondents who choose not to respond cannot obtain a Certificate of Conformity, and therefore cannot introduce their products into commerce in the U.S.

Estimated number of respondents: 49 (total).

Frequency of response: As needed.

Total estimated burden: 509,869 hours (per respondent, per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$43,090,092 (per year), includes \$15,294,661 annualized capital and \$27,795,432 operation & maintenance costs.

Changes in estimates: There is a decrease of 14,475 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is primarily due to the reduction in the burden estimated for the fuel economy information collection. The reduction in this information collection was offset by increases in the burden for the Tier 3 emissions, in-use verification, and defect reporting information collections.

Director, Implementation, Analysis and Compliance Division.
