

early learning, and school progress. The ECLS program studies deliver national data on children's status at birth and at various points thereafter; children's transitions to nonparental care, early care and education programs, and school; and children's experiences and growth through the elementary grades. The Early Childhood Longitudinal Study, Kindergarten Class of 2023–24 (ECLS–K:2024) is the fourth cohort in the series of early childhood longitudinal studies. The study will advance research in child development and early learning by providing a detailed and comprehensive source of current information on children's early learning and development, transitions into kindergarten and beyond, and progress through school. The ECLS–K:2024 will provide data about the population of children who will be kindergartners in the 2023–24 school year. Collecting parent data beginning in the fall of kindergarten will enable the study to measure influences on children's development before entry into formal schooling, including children's home environments and access to early care and education. The ECLS–K:2024 will focus on children's early school experiences continuing through the fifth grade, and will include collection of data from parents, teachers, and school administrators, as well as direct child assessments. The request to conduct a field test of the ECLS–K:2024 kindergarten and first-grade data collection activities to evaluate the design of the national study's kindergarten and first-grade surveys and child assessments, as well as the operational procedures (that is, sampling and recruitment) for the national kindergarten and first-grade data collections in the fall 2023, spring 2024, and spring 2025, was approved on February 15, 2022 (OMB# 1850–0750 v.24). Planned for August–November 2022, the ECLS–K:2024 K–1 field test will be followed by the fall (August–December 2023) and spring (March–July 2024) kindergarten national data collections, and the spring (March–July 2025) first-grade national data collection—all of which will be requested under later clearance submissions. This request is to update study respondent materials, web and paper surveys, and website designs that will be used in the K–1 field test data collection activities. The revisions in this package were made based on additional review after programming and testing the survey instruments and also incorporate changes based on teacher and parent focus group feedback (OMB# 1850–0803 v.309).

## DEPARTMENT OF ENERGY

### Agency Information Collection Extension

**AGENCY:** Office of Science, Department of Energy.

**ACTION:** Notice and request for comments.

**SUMMARY:** The Department of Energy (DOE), pursuant to the Paperwork Reduction Act of 1995, intends to extend for three years, an information collection request with the Office of Management and Budget (OMB).

**DATES:** Comments regarding this proposed information collection must be received on or before August 8, 2022. If you anticipate any difficulty in submitting comments within that period, contact listed in the **FOR FURTHER INFORMATION CONTACT** as soon as possible.

**ADDRESSES:** Written comments may be sent to: Courtney Bracey, Office of Information Management (SC–43), Office of Science, Department of Energy, GTN Building/E–180, 1000 Independence Avenue SW, Washington, DC 20585, Direct: (301) 903–1844. Or by email at [Courtney.Bracey@science.doe.gov](mailto:Courtney.Bracey@science.doe.gov). (301) 903–1844.

**FOR FURTHER INFORMATION CONTACT:**

Courtney Bracey, *Courtney.Bracey@science.doe.gov*, (301) 903-1844.

**SUPPLEMENTARY INFORMATION:** Comments are invited on: (a) whether the extended collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

This information collection request contains:

(1) *OMB No.*: 1910-5178;

(2) *Information Collection Request Title*: Portfolio Analysis and Management System (PAMS);

(3) *Type of Review*: Extension;

(4) *Purpose*: This existing collection is based on the Health Resources and Services Administration (HRSA) Electronic Handbooks software. Discretionary financial assistance proposals continue to be collected using *Grants.gov* but are imported into PAMS for use by the program offices. Under the existing information collection, an external interface in PAMS allows two other types of proposal submission: DOE National Laboratories are able to submit proposals for technical work authorizations directly into PAMS, while other Federal agencies will be able to submit proposals for interagency awards directly into PAMS. External users from all institution types are able to submit Solicitation Letters of Intent and Pre-proposals directly into PAMS. All applicants, whether they submitted through *Grants.gov* or PAMS, are able to register with PAMS to view the proposals that were submitted. They also are able to maintain a minimal amount of information in their personal profile. The existing collection automates and streamlines the submission, tracking, and correspondence portions of financial award pre-review processes.

The information collected is used by DOE to select applicants and projects for financial awards;

(5) *Annual Estimated Number of Responses*: The following numbers are calculated using the average of data received in fiscal year 2018 through fiscal year 2021. 7,278 PAMS new

registrants, who are to include 11,829 submitters of lab proposals, interagency proposals, pre-proposals, and Letters of Intent (LOI) (assuming one person per estimated submission) and 20,395 reviewers of proposals submitted through *Grants.gov*;

(6) *Annual Estimated Number of Total Responses*: Annual Estimated Number of Total Responses: The Office of Science receives about 581 DOE National Laboratory and interagency proposals per year, based on an average number of submissions received for (fiscal year 2018 through fiscal year 2021) and about 7,087 pre-proposals and letters of intent per year, based on an average of the data collected between fiscal year 2018 and fiscal year 2021);

(7) *Annual Estimated Number of Burden Hours*: 68,330;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden*: \$0.

*Statutory Authority*: Section 641 of the Department of Energy Organization Act, codified at 42 U.S.C. 7251.
