

Containers Subject to the 6 U.S.C. 944 Sealing Requirement

All loaded containers, including foreign cargo remaining on board (FROB), arriving by vessel at a port of entry in the United States on or after October 15, 2008, are required to be sealed with a seal meeting the ISO/PAS 17712 standard.

U.S. Customs and Border Protection (CBP) recognizes that there are types of containers that cannot be readily secured by use of a container freight seal meeting the ISO/PAS 17712 standard. These include tanks, non-standard containers (such as open top containers), or containers that simply cannot accommodate a seal meeting the ISO/PAS 17712 standard (such as custom built containers). These types of containers are not subject to the statutory requirement.

Enforcement of the 6 U.S.C. 944 Sealing Requirement

CBP will consider 6 U.S.C. 944 to be violated if a loaded container that is subject to the sealing requirements arrives by vessel at a port of entry in the United States on or after October 15, 2008, either (i) with no seal or (ii) with a seal that does not meet the ISO/PAS 17712 standard. These violations derive from a failure to properly seal the container.

CBP may assess a civil penalty against the party responsible for the violation of 6 U.S.C. 944 under 19 U.S.C. 1595a(b) for the attempted introduction of merchandise into the United States contrary to law.

CBP will phase in penalty assessments for violation of the container sealing requirements.

Trade Act Requirements

CBP also takes this opportunity to remind vessel carriers that pursuant to 19 CFR 4.7(b)(2) and 4.7a(c)(4)(xiv), they must transmit all seal numbers to CBP 24 hours before cargo is laden aboard a vessel at a foreign port via the Vessel Automated Manifest System (AMS).

Dated: August 4, 2008.
