Consultation

A detailed assessment of the human remains was made by Arkansas State University Museum and Arkansas Archaeological Survey professional staff in consultation with representatives of the Quapaw Tribe of Indians and The Osage Nation.

History and Description of the Remains

Between 1961 and 1962, human remains representing, at minimum, 12 individuals were removed from a cave site on the Deep Valley Ranch, in Marion County, AR, by Dr. Eugene Wittlake of Arkansas State University. The remains were subsequently donated to the Arkansas State University Museum. No known individuals were identified. The 665 associated funerary objects are 3 Mississippian plain rim sherds; 19 Mississippian plain body sherds; 130 unworked animal bones; 4 charcoal fragments; 6 wood fragments; 425 small shells; 9 mussel shell fragments; 1 celt; 8 natural lithics; 1 chert core; 2 worked stones; 10 partial projectile points; 7 projectile points; 3

partial biface lithics; and 37 chert debitage pieces.

Excavation records indicate that 10 of the individuals were in single inhumations in quadrant 12, which measured 5 feet by 5 feet. All the objects found in this quadrant were determined to be associated funerary objects. Excavation records do not indicate the location of the burials belonging to the other two individuals. Historical evidence, material culture, and oral history indicate that this region is part of the traditional territory of The Osage Nation. The Osage were semi-nomadic people who lived and hunted in southwestern Missouri, northwestern Arkansas, southeast Kansas, and northeast Oklahoma. Marion County, AR, is located on land ceded by the Osage in an 1825 treaty.

Determinations Made by the Arkansas State University Museum

Officials of the Arkansas State University Museum have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described above represent the physical remains of a minimum of 12 individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), the 665 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the associated funerary objects and The Osage Nation.

Additional Requestors and Disposition

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Dr. Marti Allen, Director, Arkansas State University Museum, P.O. Box 490, State University, Jonesboro, AR 72467, telephone (870) 972-2074, before February 25, 2013. Repatriation of the human remains and associated funerary objects to The Osage Nation may proceed after that date if no additional claimants come forward.
