SUPPLEMENTARY INFORMATION:

Summary of Information Collection

To furnish Active, Guard, and Reserve field recruiters an automated tool to create prospective Air Force enlistee application files for all recruiting accessions in officer, enlisted, and health professions. AFRIS provides comprehensive integration, interface, and standardization of all programs that manage personnel resources in support of Air Force recruiting. The system extends automated capabilities out to the individual recruiter, flight, squadron, and groups. It provides an automated interface to the Military Entrance Processing Center Station (MEPS) where applicants undergo physical, testing, verification interviews, and tentative job reservation. It will provide an automated interface to the Modernized Military Personnel System (MilMod) where only pertinent and required applicant information is placed in a

permanent military system of record. It also provides reporting capabilities at all levels of Air Force Recruiting management to make informed decisions on recruiting business rules and practices to increase the number of accessions.
