Needs and Uses: The information collected is used by several offices of the NOAA Fisheries Service, the U.S. Coast Guard, the Councils, and state fishery enforcement agencies under contract to the NOAA Fisheries Service in order to develop, implement, and monitor fishery management strategies.

These data serve as inputs for a variety of uses, including biological analyses and stock assessments, regulatory impact analyses, quota allocation selections and monitoring, economic profitability profiles, trade and import tariff decisions, allocation of grant funds among states, and analysis of ecological interactions among species. NMFS would be unable to fulfill the majority of its scientific research and fishery management missions without these data.

This request is for revision of a current information collection. Fishing vessels participating in select fisheries within the Greater Atlantic Region are currently able to submit certain required reports via an Interactive Voice Response (IVR) system. As of Spring 2021, the IVR system will no longer be available and the reports will need to be submitted using our web based system, FishOnline.

Affected Public: Individuals or households; Business or other for-profit organizations.

Frequency: On occasion, weekly, monthly.

Respondent's Obligation: Mandatory.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act.

SUPPLEMENTARY INFORMATION: The Mid-Atlantic Fishery Management Council (Council) and the Atlantic States Marine Fisheries Commission (Commission) are developing a joint action to address the overfished status via a rebuilding plan, as well as consider adjusting the bluefish fishery management plan goals and objectives, sector allocations, commercial allocations to the states, transfer processes, the approach to account for management uncertainty, and the *de minimis* provisions. The commercial and recreational allocations are currently based on historical landings from 1981–1989. This action will consider whether modifications to the allocations are needed in light of these and other changes in the fisheries.
