

authorized. Modification 2 is valid for the duration of the permit which expires on December 31, 2002.

Notice was published on June 3, 1999 (64 FR 29839), and on March 22, 2000 (65 FR 15312), that WDFW applied for a modification to scientific research permit 1203. Modification 1 to permit 1203 was issued on July 6, 2001. Permit 1203 authorizes WDFW annual takes of ESA-listed adult and juvenile salmon and steelhead associated with four scientific research studies in the UCR Basin. For modification 1, WDFW is authorized annual takes of juvenile, endangered, artificially propagated, UCR spring chinook salmon and adult and juvenile, endangered, UCR steelhead associated with the Wenatchee River Basin production research. Also, an increase in the annual take of juvenile, endangered, naturally produced, UCR spring chinook salmon is authorized for the study. Also for modification 1, annual takes of adult and juvenile, endangered, UCR spring chinook salmon and adult and juvenile, endangered, artificially propagated, UCR steelhead are added to the UCR Basin spawning ground assessment study. Also for the permit modification, annual takes of juvenile, endangered, naturally produced, UCR steelhead are added to the salmonid habitat carrying capacity study and the salmonid distribution study. Also for modification 1, WDFW is authorized annual takes of ESA-listed adult and juvenile salmon and steelhead associated with fish salvage operations in dewatered areas in the Wenatchee River Basin. ESA-listed fish indirect mortalities associated with the research and/or enhancement activities are authorized. Modification 1 is valid for the duration of the permit which expires on December 31, 2003.

Notice was published on February 21, 2001 (66 FR 11002), that USFS applied for a scientific research permit (1292). Permit 1292 was issued to USFS on July 6, 2001. Permit 1292 authorizes USFS annual takes of ESA-listed juvenile salmon and steelhead associated with research to be conducted in the Yakima River, the Wenatchee River, the Entiat River, and the Methow River in WA. The purpose of the research is to determine the extent and distribution of hybridization between westslope cutthroat trout, rainbow trout, and anadromous steelhead for selected populations in the middle Columbia River and UCR Basins. The research will benefit the ESA-listed species by providing information on westslope cutthroat trout and rainbow trout/steelhead interactions and could provide insight into possible genetic introgression of introduced rainbow

trout stocks in the areas of native rainbow trout/steelhead distribution. Permit 1292 expires on December 31, 2002.

The issuance of the permit modifications and the new permit is based on a finding that such permits: (1) were applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA.
