

Angeles to downtown Santa Monica along the Exposition railroad right-of-way. The TSM Alternative is not specific to an alignment but would rather improve service levels of existing bus service in the general Westside Corridor. Additionally, a No Build Alternative will evaluate the impacts of doing nothing to improve transit service during the twenty year planning timeframe of the project, beyond those improvements already scheduled and funded.

**Probable Effects:** The FTA and MTA will evaluate all significant environmental, social and economic impacts of the alternatives in the Draft EIS/EIR. Potential impact categories which will be evaluated include: Land Use and Development; Economic Impacts; Displacement and Relocation; Traffic Circulation and Parking; Community and Neighborhood Impacts; Environmental Justice; Visual and Aesthetic Impacts; Air Quality; Noise and Vibration; Geotechnical Considerations; Water Resources; Natural Resources; Energy; Safety and Security; Cultural Resources; Community Facilities and Parklands; and Construction Impacts. The impacts will be evaluated both for the construction period and the long-term period of operation. Measures to mitigate adverse impacts will also be addressed.

**FTA Procedures:** After the scope of the EIS/EIR evaluation has been determined, FTA and MTA will conduct the analyses and interagency coordination necessary to prepare a Draft EIS/EIR. The Draft EIS/EIR will be made available for public and agency review and comment, and a public hearing will be held. On the basis of the Draft EIS/EIR and comments received, MTA will select a Locally Preferred Alternative. If FTA approves of advancing the Locally Preferred Alternative into Preliminary Engineering (PE), the Final EIS/EIR responding to comments received and incorporating the results of PE, would then be prepared and released.
