energy may be applied to the extent necessary to meet off-peak requirements of such customers in lieu of purchasing deficiency energy to meet such off-peak requirements.

Any on-peak and off-peak Project energy made available in any billing month over and above that required for transfers to the Georgia Power Company for the account of the Government and to meet the above requirements of preference customers shall be classified as energy sold under this rate schedule.

The energy requirements of the Government's preference customers shall be the total energy requirements of such customers so long as the Government is supplying the total capacity required. In any month when both the Government and the Company are supplying capacity to a preference customer, each kilowatt of capacity shall be considered to be accompanied by an equal quantity of energy. The energy supplied by the Government shall come from its own resources or from purchases from the Company and shall be accounted for as transmitted for the account of the Government. Energy delivered to preference customers by the Company shall be increased by 7 percent to provide for losses in transmission.

Billing Month: The billing month under this schedule shall end at 12:00 midnight on the 20th day of each calendar month.

Power Factor: The purchaser and seller under this rate schedule agree that they will both so operate their respective systems that neither party will impose an undue reactive burden on the other.
