

principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: International Air Transport Association, Montreal, Quebec, CANADA. The nature and scope of IATA's standards development activities are: To develop, promulgate and publish voluntary consensus standards for international air transportation services provided by airlines and their agents and representatives to passengers, shippers and postal authorities. The IATA standards establish common practices and procedures, documentation and communication formats for the processing and handling of passengers, cargo and mail in the complex international air transportation environment. IATA's voluntary consensus standards are developed by IATA member airlines in consultation with other interested parties, including governments and intergovernmental organizations, whose expertise is sought as part of the standards development process.

Additional information concerning IATA can be obtained from Constance O'Keefe, Acting General Counsel of IATA, at (514) 874-0202.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—International Institute of Ammonia Refrigeration

Notice is hereby given that, on September 20, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), International Institute of Ammonia Refrigeration ("IIAR") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standard development organization and

(2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: International Institute of Ammonia Refrigeration, Arlington, VA. The nature and scope of IIAR's standards development activities are: To develop, plan, establish, coordinate and publish voluntary consensus standards applicable to the field of the design, construction, installation and use of ammonia mechanical refrigeration systems. Specifically, IIAR develops, plans, establishes, coordinates and publishes voluntary consensus standards in the form of industry standards, technical bulletins, and regulatory guidelines covering topics including equipment, design and installation of ammonia mechanical refrigeration systems; product integrity of ammonia refrigeration valves and strainers; training guidelines for operators of ammonia refrigerating systems; technical guidance addressing topics such as good practices, safety procedures and information, operating procedures, water contamination, and machinery room ventilation; and guidelines for compliance with regulatory requirements governing Process Safety Management and Risk Management.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—International Staple, Nail, and Tool Association

Notice is hereby given that, on September 8, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the International Staple, Nail, and Tool Association ("ISANTA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and

scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: International Staple, Nail, and Tool Association, La Grange, IL. The nature and scope of ISANTA's standards development activities are: To develop, plan, establish and coordinate voluntary consensus standards applicable to safety requirements for portable hand-held compressed air powered tools which drive fasteners such as nails and staples on a national level (American National Standards). Through its standards development activities, ISANTA seeks to establish safety requirements for the design, construction, use and maintenance of portable hand-held compressed air-powered tools to guard against the injury of tool users and bystanders in the workplace. ISANTA also provides guidelines to manufacturers, owners, employers (including self-employed contractors), supervisors, purchasers, operators and other persons concerned with or responsible for safety in the workplace and assists in the promulgation of appropriate safety directives and safety training programs.
