

scientific basis for explaining the additional losses in the line of sight range above and beyond the free space loss and two-ray-loss. The Commission is requesting a detailed description of the methodological changes that would be offered for addressing these aspects of the model and how they would improve the model to better estimate digital television signal strengths at individual locations. Such additional submissions should also include computer software that implements these methodological changes, to the extent that it is available, for evaluation by our engineering staff. The Commission also requests comment and technical evaluations from interested parties on the changes Mr. Shumate proposes. In his submission in this proceeding, Mr. Shumate provides a brief description of a comparison of estimates generated using the current ILLR model and the "ITWOM" with the improvements he suggests. The Commission now requests additional information on this comparison and also the submission of additional data and information that provides comparative analysis of the two methods. Interested parties are also invited to submit additional proposals and suggestions for improving the digital ILLR model. The Commission is particularly interested in information on any other techniques for improving the degree to which the model accurately represents the propagation of a digital television signal from a transmitter to a specific receive site and any new data that may be available for improving the model's predictions.

A. Initial Regulatory Flexibility Certification.

3. The Regulatory Flexibility Act of 1980, as amended (RFA),¹ requires that an initial regulatory flexibility analysis be prepared for notice and comment rulemaking proceedings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities."² The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."³ In addition, the term "small business" has the same meaning as the term "small business concern" under the Small

Business Act.⁴ A "small business concern" is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).⁵

4. The Commission is providing a plan for the model's continued refinement by use of additional data as it may become available. Under that plan, refinements based on additional data may be proposed by referencing the docket of this proceeding, which will be held open indefinitely for this purpose. Consistent with this intention to refine the model as new information becomes available, the Commission is initiating this *Further Notice of Proposed Rulemaking* herein to request comment on possible modifications to the methodology in the digital Individual Location Longley-Rice (ILLR) model to improve its predictive accuracy as suggested by one of the parties responding to the *Notice of Proposed Rulemaking*, 75 FR 46885, August 4, 2010, in this proceeding. The methodological changes to be addressed in the Further NPRM would change the manner in which our predictions are calculated but would not alter the administrative burden on any of the small business entities that would use or be affected by the predictive model. Therefore, the Commission does not expect these changes to have any economic impact on small entities.

5. Therefore, we certify that the proposals in this *Notice of Proposed Rulemaking*, if adopted, will not have a significant economic impact on a substantial number of small entities. If commenters believe that the proposals discussed in the NPRM require additional RFA analysis, they should include a discussion of these issues in their comments and additionally label them as RFA comments. The Commission will send a copy of the NPRM, including a copy of this initial certification, to the Chief Counsel for Advocacy of the SBA.⁶

B. Paperwork Reduction Act Analysis:

6. This document does not contain proposed information collection(s)

subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. In addition, therefore, it does not contain any new or modified "information collection burden for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, *see* 44 U.S.C. 3506(c)(4).

Ordering Clauses

7. Pursuant to sections 1, 4, 301, and 339(c)(3) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154, 301, 339(c)(3), and section 119(d)(10)(a) of the Copyright Act, 17 U.S.C. 119(d)(10)(a), this *further notice of proposed rulemaking is hereby adopted*.

8. The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *shall send* a copy of this *further notice of proposed rulemaking*, including the Initial Regulatory Flexibility Certification, and IRFA, to the Chief Counsel for Advocacy of the Small Business Administration.

9. The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *shall send* a copy of the Further Notice of Proposed Rulemaking, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration, to Congress and the General Accounting Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).⁷

10. The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, will send a copy of this NPRM, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration, in accordance with the Regulatory Flexibility Act.

SUPPLEMENTARY INFORMATION:

A. Background

Current DFARS policy requires contractors to report to the DoD Item Unique Identification (IUID) Registry property that is classified as equipment, special tooling, and special test

equipment items valued at \$5,000 or more, and items valued at less than \$5,000 when required in accordance with contract terms and conditions. In lieu of these dollar thresholds, reporting requirements are being revised and expanded to require contractors to report Government-furnished property (GFP) with existing unique item identification to the DoD IUID Registry; and all GFP without an existing unique item identification shall be reported to the DoD GFP Hub.

The clause at 252.211–7007, Reporting of Government-Furnished Equipment in the DoD Item Unique Identification (IUID) Registry, is being renamed as “Reporting of Government-Furnished Property,” revised to expand definitions, and provide guidance on reporting of GFP to the DoD IUID Registry or the GFP Hub. This clause applies to commercial contracts that have GFP and reporting applicability, and is added to the list of solicitation provisions and contract clauses applicable to the acquisition of commercial items at 212.301.

Additionally, the clause at 252.251–7000 is revised to require electronic receipts of property obtained from a Government supply source.

B. Regulatory Flexibility Act

DoD has prepared an initial regulatory flexibility analysis consistent with 5 U.S.C. 603. A copy of the analysis may be obtained from the point of contact specified herein. The analysis is summarized as follows:

The objective of the rule is to improve the accountability and control of DoD assets. This rule proposes to amend the Defense Federal Acquisition Regulation Supplement to revise and expand reporting requirements for Government-furnished equipment to include GFP that is both uniquely and non-uniquely identified, and clarifies policy for contractor access to Government supply sources. The proposed clause requires contractors to identify and report Government-furnished property with existing unique item identification to the DoD IUID Registry; and all GFP without an existing unique item identification shall be reported to the DoD GFP Hub. At this time, DoD is unable to estimate the number of small entities to which this rule will apply. Therefore, DoD invites comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DoD will also consider comments from small entities concerning the existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such

comments separately and should cite 5 U.S.C. 610 (DFARS Case 2009–D043) in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) applies because the rule imposes information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* The information collection requirements under this proposed rule were formerly approved by the Office of Management and Budget, under clearance number 0704–0246. The requirements of this proposed rule are expected to have only a marginal impact, and are not expected to change the overall burden hours approved under clearance number 0704–0246. The rule removes the mandatory \$5,000 unit acquisition cost dollar threshold for reporting. This does not significantly impact items valued at less than \$5,000 in unit acquisition cost as they were also previously required to be reported if they were serially managed, mission essential, sensitive, or controlled inventory. While the proposed rule adds reporting of Government-furnished material and reparables, this additional requirement is expected to be offset by removal of the \$5,000 mandatory reporting threshold. Interested parties are invited to provide comments on the potential impact.

Serial number means an assigned designation that provides a means of identifying a specific individual item.

Special test equipment means either single or multipurpose integrated test units engineered, designed, fabricated, or modified to accomplish special purpose testing in performing a contract. It consists of items or assemblies of equipment including foundations and similar improvements necessary for installing special test equipment, and standard or general purpose items or components that are interconnected and interdependent so as to become a new functional entity for special testing purposes. Special test equipment does not include material, special tooling, real property, or equipment items used for general testing purposes, or property that with relatively minor expense can be made suitable for general purpose use.

Special tooling means jigs, dies, fixtures, molds, patterns, taps, gauges, and all components of these items, including foundations and similar improvements necessary for installing special tooling, and which are of such a specialized nature that without substantial modification or alteration their use is limited to the development or production of particular supplies or parts thereof or to the performance of particular services. Type designation means a combination of letters and numbers arranged in a specific sequence to provide a short significant method of identification.

Unique item identifier (UII) means a set of data elements permanently marked on an item that is globally unique and unambiguous and never changes, in order to provide traceability of the item throughout its total life cycle. The term includes a concatenated UII or a DoD recognized unique identification equivalent.

Unit of issue means the physical measurement of count or quantity (such as each, dozen, gallon, or kilogram) in which an item is procured, stored, and released.
