History and Description of the Remains

Between 1955 and 1957, human remains representing, at minimum, two individuals were removed from Waiahukini Rockshelter Site in Ka'u, Hawai'i Island, HI, which are on lands belonging to Kamehameha Schools (formerly Bishop Estate Trust). Excavations were under the direction of Professor William Bonk at the University of Hawai'i at Hilo (then called Hilo College) and the Bishop Museum. Three human teeth were identified in bags of midden deposit in the summer of 2014, which had been stored with the other excavated material from the site at University of Hawai'i at Hilo until the present time. No known individuals were identified. No funerary objects are present.

Although some historical era artifacts were identified in the uppermost layers of Waiahukini, the human remains were identified in midden deposits dated to the pre-Contact era.

These collections remain in the physical custody of University of Hawai'i at Hilo although control of the collections is with Kamehameha Schools.
