Prior to submitting a certification application for a Class B AIS device, the following information must be submitted in duplicate to the Commandant (CG–521), U.S. Coast Guard, 2100 2nd Street, SW., Washington, DC 20593–0001: (1) The name of the manufacturer or grantee and the model number of the AIS device; and (2) copies of the test report and test data obtained from the test facility showing that the device complies with the environmental and operational requirements identified in IEC 62287–1. The regular license period for stations in the Experimental Radio Service is either two or five years.

The information submitted on FCC Form 405 is used by Commission staff to evaluate the applicant/licensee's need for a license renewal. In performing this function, staff performs analysis of the renewal request as compared to the original license grant to ascertain if any changes are requested. If so, additional analysis is performed to determine if such changes met the requirements of the rules of the Experimental Radio Service for interference free operation. If needed, the collected information is used to coordinate such operation with other Commission bureaus or other Federal Agencies. All applications are also analyzed on their merits regarding whether they meet the general requirements for an Experimental license. These requirements are set out in 47 CFR part 5.
