

student academic achievement, staff and parents, and expanding the number of high-quality charter schools available to students across the nation.

Charter school authorization is at the very crux of any efforts to expand and ensure high-quality public school choice options through public charter schools because charter school authorizers are the public entities primarily responsible for: initial charter authorizations, on-going monitoring and oversight, and charter renewal and closure decisions.

Currently, there is no other comprehensive national database of the roughly 900 charter school authorizers complete with the schools under their authority; some of these data elements are available from public documents, but they are not made available to the public consistently across all authorizers. There is also no other comprehensive, fully-populated tool for tracking the activities of and evaluating the quality of authorizers nationwide based on their authorizing decisions in light of schools performance. This data collection will be administered to the all charter school authorizers.
