SUPPLEMENTARY INFORMATION:

Title: FERC-717, Standards for Business Practices and Communication Protocols for Public Utilities.

OMB Control No.: 1902-0173.

Type of Request: Three-year approval of the FERC-717 information collection requirements with no changes to the current reporting requirements.¹

Abstract: This notice pertains to a requirement that Transmission Providers² provide certain information regarding their transmission operations on an Open Access Same-Time Information System (OASIS). This requirement was established because the Commission has determined that Transmission Customers³ must have simultaneous access to the same information available to the

Transmission Provider in order to receive nondiscriminatory transmission services in accordance with section 205 of the Federal Power Act.⁴

Regulations at 18 CFR part 37 authorize Transmission Providers to operate an OASIS either individually or jointly with other Transmission Providers. These regulations also provide that a Transmission Provider may delegate this responsibility to a Responsible Party⁵ such as another Transmission Provider, an Independent System Operator, a Regional Transmission Group, or a Regional Reliability Council.

The information that must be posted at OASIS sites is listed at 18 CFR 37.6. The required postings include business practices, communication protocols, transfer capacity, transmission service products, and prices. Some of the required business practices and communication protocols are incorporated by reference at 18 CFR 38.1.

The 60-day notice was published on September 14, 2020 (85 FR 56595) and no comments were received during the comment period.

Type of Respondents: Transmission Providers and Responsible Parties.

*Estimate of Annual Burden:*⁶ The Commission's burden estimate accounts for the likely double-counting of responses in previous information collection requests, which did not recognize that a Transmission Provider may operate an OASIS site jointly with another Transmission Provider, or may delegate the relevant responsibilities to a Responsible Party. The responses submitted at present are our best estimate.

FERC-717, STANDARDS FOR BUSINESS PRACTICES AND COMMUNICATION PROTOCOLS FOR PUBLIC UTILITIES⁷

Information collection requirements	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hours & cost per response ⁸	Total annual burden hours & total annual cost

Total	327	6,510 hrs.; \$540,330

¹ This notice does not address the NOPR for RM05-29 and RM05-30.

² Under 18 CFR 37.3(a), a Transmission Provider is any public utility that owns, operates, or controls facilities used for the transmission of electric energy in interstate commerce.

³ Under 18 CFR 37.3(b), a Transmission Customer is any eligible customer (or its designated agent)

that can or does execute a transmission service agreement or can or does receive transmission service.

⁴ 16 U.S.C. 824d.

⁵ Under 18 CFR 37.3(c), a Responsible Party is a Transmission Provider or an agent to whom the Transmission Provider has delegated the

responsibility of meeting any of the requirements of 18 CFR part 37.

⁶ Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

⁷ This collection includes the one-time burden of 10 hrs. (over a 3 year period of time) for the Final Rule RM05-25,05-26,05-27 [ICR Reference No: 202002-1902-006] and will not affect the NOPR RM05-5-29, 05-30 issued in the **Federal Register** on 9/04/2020 and has not been submitted to OMB to date.

⁸ The Commission staff thinks that the average respondent for this collection is similarly situated to the Commission, in terms of salary plus benefits. Based upon FERC's FY 2020 annual average of \$172,329, (for salary plus benefits), the average hourly cost is \$83/hour.
