## DEPARTMENT OF TRANSPORTATION

### Federal Railroad Administration

[Docket No. FRA–2023–0002–N–5]

#### Proposed Agency Information Collection Activities; Comment Request

**AGENCY:** Federal Railroad Administration (FRA), Department of Transportation (DOT).

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, FRA seeks approval of the Information Collection Request (ICR) abstracted below. Before submitting this ICR to the Office of Management and Budget (OMB) for approval, FRA is soliciting public comment on specific aspects of the activities identified in the ICR.

**DATES:** Interested persons are invited to submit comments on or before May 23, 2023.

**ADDRESSES:** Written comments and recommendations for the proposed ICR should be submitted on [regulations.gov](https://www.regulations.gov) to the docket, Docket No. FRA–2023–0002. All comments received will be posted without change to the docket, including any personal information provided. Please refer to the assigned OMB control number (2130–0599) in any correspondence submitted. FRA will summarize comments received in response to this notice in a subsequent notice and include them in its information collection submission to OMB for approval.

**FOR FURTHER INFORMATION CONTACT:** Ms. Arlette Mussington, Information Collection Clearance Officer, at email: [arlette.mussington@dot.gov](mailto:arlette.mussington@dot.gov) or telephone: (571) 609–1285, or Ms. Joanne Swafford, Information Collection Clearance Officer, at email: [joanne.swafford@dot.gov](mailto:joanne.swafford@dot.gov) or telephone: (757) 897–9908.

**SUPPLEMENTARY INFORMATION:** The PRA, 44 U.S.C. 3501–3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60-days’ notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. *See* 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. Specifically, FRA invites interested parties to comment on the following ICR regarding: (1) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA’s estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology. *See* 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes that soliciting public comment may reduce the administrative and paperwork burdens associated with the collection of information that Federal regulations mandate. In summary, FRA reasons that comments received will advance three objectives: (1) reduce reporting burdens; (2) organize information collection requirements in a “user-friendly” format to improve the use of such information; and (3) accurately assess the resources expended to retrieve and produce information requested. *See* 44 U.S.C. 3501.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

*Title:* System Safety Program Plan.

*OMB Control Number:* 2130–0599.

*Abstract:* In 2020, FRA issued a final rule<sup>1</sup> that requires passenger rail

operations to develop and implement a system safety program (SSP) to improve the safety of their operations. Each passenger rail operation has the flexibility to tailor an SSP to its specific railroad operations.

FRA uses the information collected to help ensure that commuter and intercity passenger rail operations establish and implement SSPs to improve the safety of their operations and to confirm compliance with the rule. Each railroad operation should use its SSP to proactively identify and mitigate or eliminate hazards and the resulting risk on its system at an early stage to reduce the number of railroad accidents, incidents, and associated injuries, fatalities, and property damage. A passenger rail operation has the flexibility to tailor an SSP to its specific operations. An SSP will be implemented when FRA approves a passenger rail operation’s submitted SSP plan. Under the SSP regulation, FRA will audit a passenger rail operation’s compliance with its SSP plan and will use the information collected to ensure compliance with this regulation.

In this 60-day notice, FRA has made multiple adjustments to its estimated paperwork burden, resulting in a reduction of 388 hours, from 2,279 hours in the current inventory to 1,891 hours in the requested inventory. The primary reason for the reduction in the estimated paperwork burden is the expected decrease in the number of responses. Specifically, all passenger rail operations currently subject to the regulation have already submitted their SSP plans, leading to a decrease in the overall PRA burden. This reduction in submissions, reduced by 427 hours, has significantly contributed to the overall decrease in the estimated paperwork burden hours in the requested inventory. FRA has uploaded a table on [regulations.gov](https://www.regulations.gov) under Docket No. FRA–2023–0002, which displays all the burden adjustments.

*Type of Request:* Extension without change (with changes in estimates) of a currently approved collection.

*Affected Public:* Businesses.

*Form(s):* N/A.

*Respondent Universe:* 33 passenger rail operations + 1 new passenger rail operation.

*Frequency of Submission:* On occasion.
