

sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The control numbers for this collection are 1018-0095 and 1018-0096.

Because the number of reports generated annually by the general

public (rather than cooperating agencies or separately permitted individuals) under these rules is extremely small (far less than one report per year, per rule) and to assure thorough documentation of results, the Service is estimating the number of expected reports to assume a maximum number per year based on

allowance for increased population size and public awareness of experimental populations.

The following existing experimental populations described under Title 50 of the Code of Federal Regulations contain information collection requirements:

50CFR section	Species (scientific name)	Type of reporting
17.84(c)	Red Wolf (<i>Canis rufus</i>)	Take in defense of human life, incidental take, take related to livestock depredation.
17.84(g)	Black footed ferret (<i>Mustela nigripes</i>)	Incidental take, specimen collection/reporting.
17.84(h)	Whooping crane (<i>Grus americana</i>)	Specimen collection/reporting.
17.84(i)	Gray wolf (<i>Canis lupus</i>)	Take in defense of human life, incidental take take related to livestock depredation.
17.84(j)	California condors (<i>Gymnogyps californianus</i>)	Specimen collection/reporting, incidental take.
17.84(k)	Mexican gray wolf (<i>Canus lupus baileyi</i>)	Take in defense of human life, incidental take, take related to livestock depredation.
17.84(l)	Grizzly bear (<i>Ursus horribilis</i>)	Take in defense of human life, incidental take take related to livestock depredation.

Future experimental populations that are established will require the same types of reports as listed above. This proposed information collection notice would also apply to future experimental

populations that encompass the same information requirements outlined above to streamline the process.

Title: Endangered and Threatened Wildlife, 50 CFR 17.84, Experimental populations.

Burden Estimates for Reporting Requirements for Experimental Populations—Endangered Species:

Type of report	Number of respondents	Average time required per report	Total Annual burden
General take or removal ^a	20	15 minutes	5 hours.
Depredation related take ^b	22	15 minutes	5.5 hours.
Specimen collection ^c	20	15 minutes	5 hours.

(a) General take or removal includes human related mortality including unintentional taking incidental to otherwise lawful activities (e.g. highway mortalities), take in defense of human life, take related to defense of property (if authorized) or take in the form of authorized harassment.

(b) Depredation-related take is take for management purposes where livestock depredation has been documented and may include authorized harassment or authorized lethal take of experimental animals in the act of attacking livestock.

(c) Specimen collection, recovery, or reporting of dead individuals from experimental populations for documentation purposes or authorized scientific collection purposes.

Description of Respondents: Private individuals and households, businesses, not-for-profit organizations, and farms.

Number of Respondents: 62.

Frequency of Collection: On Occasion.

Total Annual Burden hours: 16.

Total Annual Responses: 62.

Total Annual Non-hour Cost Burden:

0.

Bureau form number: N/A.

Date: August 13, 2001.

Rebecca A. Mullin,

Information Collection Officer.

Endangered and Threatened Species Permit Applications

ACTION: Notice of receipt of applications.

SUMMARY: The following applicants have applied for a scientific research permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*).

Permit No. TE-046447

Applicant: U.S. Geological Survey, CERC, Yankton Field Research Station, Yankton, South Dakota. Applicant requests a permit to take the Rio Grande silvery Minnow (*Hybognathus amarus*) in conjunction with spawning, propagating and conducting toxicological testing for scientific research and recovery purposes within New Mexico and Yankton, South Dakota.

Permit No. TE-819538

Applicant: Bureau of Land Management, Phoenix, Arizona. Applicant requests an amendment to an

existing permit to add the Kearney's blue-star (*Amsonia kearneyana*) for collection in conjunction with scientific research and recovery purposes within Arizona.

Permit No. TE-046517

Applicant: USGS New Mexico Coop Fish and Wildlife Research Unit, Las Cruces, New Mexico. Applicant requests a permit for recovery purposes to conduct surveys for the Rio Grande silvery Minnow (*Hybognathus amarus*) in conjunction with propagation and scientific research at Las Cruces, New Mexico.

DATES: Written comments on these permit applications must be received on or before September 20, 2001.

ADDRESSES: Written data or comments should be submitted to the Chief, Endangered Species Division, Ecological Services, P.O. Box 1306, Room 4102, Albuquerque, New Mexico 87103; (505) 248-6649; Fax (505) 248-6788.

Documents will be available for public inspection by written request, by appointment only, during normal business hours (8:00 to 4:30) at the U.S. Fish and Wildlife Service, Albuquerque, New Mexico. Please refer to the respective permit number for each application when submitting comments. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Chief, Endangered Species Division, Albuquerque, New Mexico, at the above address. Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice, to the address above.

Steven M. Chambers,

Acting Assistant Regional Director, Ecological Services, Region 2, Albuquerque, New Mexico.

Notice of Receipt of Applications for Permit

Endangered Species

The public is invited to comment on the following application(s) for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*). Written data, comments, or requests for copies of these complete applications should be submitted to the Director (address below) and must be received within 30 days of the date of this notice.

Applicant: Susan Gardner, c/o U.S. Environmental Protection Agency, Cincinnati, OH, PRT-046123.

The applicant requests a permit to import samples obtained opportunistically from Mexico of salvaged carcasses of wild olive ridley sea turtle, *Lepidochelys olivacea*, and green sea turtle, *Chelonia mydas*, for the purposes of scientific research. This notification covers activities conducted by the applicant over a five-year period.

Marine Mammals

The public is invited to comment on the following application(s) for a permit to conduct certain activities with marine

mammals. The application(s) was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) and the regulations governing marine mammals (50 CFR 18).

Written data, comments, or requests for copies of these complete applications or requests for a public hearing on these applications should be submitted to the Director (address below) and must be received within 30 days of the date of this notice. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such a hearing is at the discretion of the Director.

Applicant: Steven A. Reedy, Terre Haute, IN, PRT-042516.

The applicant requests a permit to import a polar bear (*Ursus maritimus*) sport hunted from the Southern Beaufort Sea polar bear population in Canada for personal use.

Applicant: Steve Tennant, Terre Haute, IN, PRT-046729

The applicant requests a permit to import a polar bear (*Ursus maritimus*) sport hunted from the Southern Beaufort Sea polar bear population in Canada for personal use.

The U.S. Fish and Wildlife Service has information collection approval from OMB through March 31, 2004, OMB Control Number 1018-0093. Federal Agencies may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a current valid OMB control number.

Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice to: U.S. Fish and Wildlife Service, Division of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203, telephone 703/358-2104 or fax 703/358-2281.

Dated: August 10, 2001.

Monica Farris,

Senior Biologist, Branch of Permits, Division of Management Authority.

Interim Strategy on Section 7 Consultations under the Endangered Species Act for Watercraft Access Projects in Florida That May Indirectly Affect the Florida Manatee

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final interim strategy document.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the final interim strategy to comply with the provisions of the Endangered Species Act of 1973, as amended (ESA), on actions resulting in increased watercraft access in Florida. This final interim strategy represents our guidance regarding conservation measures that should be incorporated into watercraft access facility designs in order that, in some cases, projects would not likely cause incidental take of the Florida manatee (*Trichechus manatus*). This final interim strategy document does not address all of the ways in which a watercraft access project could have indirect effects which constitute an incidental take of manatees as defined by the ESA and Marine Mammal Protection Act (MMPA). Instead, this final interim strategy document focuses on one particular form of potential incidental take—the increased likelihood of manatee mortalities and injuries as a result of collisions with watercraft.

We believe that increased manatee speed zone enforcement is the primary conservation measure through which proposed projects could reduce the incidental take associated with watercraft collisions to an unlikely to occur level. Since publication of the draft interim strategy, we have become aware that the State of Florida has refocused its existing law enforcement efforts, as well as deployed additional law enforcement officers specifically to enforce manatee protection laws. The State's law enforcement initiative will result in a more effective means to address the indirect effects of watercraft access development on manatees. We, therefore, have modified the draft interim strategy to eliminate the contribution because the State has come forward with an initiative that resolves law enforcement issues in manatee waters and we have determined that the contribution portion of the interim strategy is no longer necessary. As appropriate, we considered and incorporated comments received during
