

ODS after April 18, 1994. Measures to protect confidentiality of information collected under the SNAP program are based on EPA's confidentiality regulations (40 CFR 2.201 *et seq.*, or subpart B). Submitters may designate all or portions of their forms or petitions as confidential. EPA requires the submitters to substantiate their claim of confidentiality. Under CAA section 114(c), emissions information may not be claimed as confidential.

Any substitute which is a new chemical must also be submitted to the Agency under the New Chemicals (Premanufacture Notice) program under the Toxic Substances Control Act (TSCA). Furthermore, alternatives that will be used as sterilants must be filed jointly with EPA's Office of Pesticide Programs and with SNAP.

Form Numbers: 1264–14; 1265–14.

Respondents/affected entities:

Manufacturers, importers, formulators, and processors of substitutes for ODS.

Respondent's obligation to respond: Mandatory (40 CFR 82.176).

Estimated number of respondents: 154 (per year).

Frequency of response: Annual.

Total estimated burden: 4,855 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$444,249, which includes \$22,912 annualized capital or operation & maintenance costs.

Changes in the Estimates: The number of SNAP submissions each year is expected to remain the same from the previous ICR, at an average of 15 per year during the next 3 years. In 2020 the Agency received 20 new SNAP submissions, and in 2021 the Agency received 13 submissions. In the first 10 months of 2022, the Agency received 6 submissions, although multiple submissions applied for more than 5 end-uses. Many of the recent SNAP submissions, and those anticipated over the next three years, are for chemicals previously found acceptable for other SNAP applications or for blends of alternatives already found acceptable. The burden of developing supporting information for the majority of these submissions is expected to decrease because it is easier to find and review information for substitutes that have been reviewed previously.

There is an estimated 20% reduction in the number of respondents responsible for recordkeeping for substitutes acceptable subject to use conditions and narrowed use limits. This reduction is expected because the increased availability of alternatives decreases the need for industry to use alternatives previously listed as

acceptable subject to narrowed use limits.
