The use of a right-of-way, interagency agreement, or cooperative agreement would not adequately preserve the unique resources located at this site. There are no suitable alternative sites since preserving the unique resource within the lands described in PLO No. 7614 is the reason for the application for withdrawal extension.

Comments will be available for public review. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personally identifying information—may be made publicly available at any time. While you may ask the BLM in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

An opportunity for a public meeting may be afforded in connection with the application for withdrawal extension. All interested persons who desire a public meeting for the purpose of being heard on the application for this withdrawal extension must submit a written request to the State Director, BLM Oregon/Washington State Office at the address in the **ADDRESSES** section, within 90 days from the date of publication of this notice. If the authorized officer determines that a public meeting will be held, a notice of the date, time, and place will be published in the **Federal Register** and local newspapers and posted on the BLM website at: www.blm.gov at least 30 days before the scheduled date of the meeting. This withdrawal extension application will be processed in accordance with the regulations set forth in 43 CFR 2310.4.

Public Land Order No. 7930; Extension of Public Land Order No. 6476 for Wheeler Creek Natural Area; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order extends the duration of the withdrawal created by Public Land Order (PLO) No. 6476, as extended by PLO No. 7572, for an additional 20-year period. PLO No. 6476 withdrew 334 acres of National Forest System lands in the Rogue River-Siskiyou National Forest from location and entry under the United States mining laws to protect the Wheeler Creek Research Natural Area (RNA).

DATES: This PLO takes effect on October 5, 2023.

FOR FURTHER INFORMATION CONTACT:

Luke Poff, Realty Specialist, Bureau of Land Management Oregon/Washington State Office, P.O. Box 2965, Portland, OR 97208, (503) 808-6249, or by email at lpoff@blm.gov. The United States Forest Service, Rogue River-Siskiyou National Forest Supervisor's Office can be reached at 3040 Biddle Road, Medford, Oregon 97504, (541) 618-2200. Individuals in the United States who are deaf, blind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The purpose of the withdrawal extended by this PLO is to maintain the protection of the Wheeler Creek RNA. PLO No. 6476 (48 FR 45395 (1983)), as extended by PLO No. 7572 (68 FR 42127 (2003)), incorporated herein by reference, withdrew 334 acres of National Forest System lands from location and entry under the United States mining laws to protect the Wheeler Creek RNA in Curry County, Oregon, from any adverse impacts of such activities. The

withdrawal extension is necessary to continue that protection.

Order

By virtue of the authority vested in the Secretary of the Interior by section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), it is ordered as follows:

1. PLO No. 6476, as extended by PLO No. 7572 for an additional 20-year period, which withdrew 334 acres of National Forest System lands from location and entry under the United States mining laws to protect the Wheeler Creek Research Natural Area in support of Forest Service programs, is hereby extended, subject to valid existing rights, for an additional 20-year period.

2. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted prior to the expiration date pursuant to Section 204(f) of the Federal Land Policy and Management Act, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be further extended.

Additional information on the determinations in this notice,

including the results of consultation, can be found in the inventory or related records held by Kansas State University.

Description.

Human remains representing, at minimum, six individuals were removed from the Cochran Mound, 23PL86, in Platte County, KS. The Cochran Mound is a burial mound on private land. It occupies a portion of the highest point of the left (east) bluff of the Missouri River, just upstream from the confluence of Brush Creek with the river. The mound measures 102 feet long (north-south) by 86 feet wide (east-west), and it contains a stone vault measuring 8.75 feet square. Excavation of the Cochran Mound was conducted in June of 1971 by staff and students of the Kansas Archaeological Field School, under the direction of Dr. Patricia J. O'Brien of Kansas State University. Excavation showed that it had been severely looted by an unknown person or persons at an unknown time in the past. Collections were processed and cataloged by field school students and then removed to the archeology laboratory at Kansas State University for analysis, reporting, and curation. They have remained in the university's possession since that time. The human remains are commingled and are highly fragmented. Some of the bones were burnt, suggesting that cremation had occurred. As some of the artifacts also show heat fractures, they may have been with the bodies at the time of cremation. The human remains belong to four adults, one juvenile, and one infant. One of the adults is female and another adult was at least 45 years of age or older at the time of death. The 17 associated funerary objects are one projectile point, four biface fragments, one retouched flake, five bullets (historic), one hematite stone, one shell bead, one lot consisting of gastropod shells, two charcoal samples, and one lot consisting of stone debitage (approximately 38 pieces).

Human remains representing, at minimum, six individuals were removed from the Cogan Mounds, 23PL125, in Platte County, MO. The Cogan Mounds are comprised of two burial mounds on private land. Mound 1 measures about five meters in diameter and was made of various sized limestone slabs mixed with dirt. It contained the remains of a disturbed limestone vault measuring 1.78 meters long on the north side and 2.20 meters on the west side (the east and south sides were sufficiently damaged as to preclude measurement). No entrance was found. The presence of Euromerican debris indicated prior
