SUPPLEMENTARY INFORMATION:

A. Purpose

GSA has various mission
responsibilities related to the
acquisition and provision of supplies,
transportation, information technology,
telecommunications, real property
management, and disposal of real and
personal property. These mission
responsibilities generate requirements
that are realized through the solicitation
and award of public contracts.

Most GSA procurement-related
information collections are required by
the Federal Acquisition Regulation
(FAR) or General Services
Administration Acquisition Regulation
(GSAR); each clause requiring such a
collection must be individually
approved by OMB. However, some
solicitations require contractors to
submit information specific to that
contracting action, such as information
needed to evaluate offers (e.g. specific
instructions for technical and price
proposals, references for past
performance) or data used to administer
resulting contracts (e.g. project
management plans).

This information collection is
currently associated with GSA's
information collection requirements
contained in solicitations issued in
accordance with the Uniform Contract
Format under FAR Part 14, Sealed
Bidding (see GSAR 514.201-1); FAR
Part 15, Contracting by Negotiation (see
GSAR 552.215-73); and solicitations
under FAR Part 12, Acquisition of
Commercial Items (see GSAR 512.301).
This includes information collection
requirements found in GSA Federal
Supply Schedule (FSS) solicitations.

U.S. Department of Health and Human Services (HHS)

Order Under Sections 361 & 365 of the Public Health Service Act (42 U.S.C. 264, 268) and 42 Code of Federal Regulations Part 70 (Interstate) and Part 71 (Foreign):

Third Modification and Extension of No Sail Order and Other Measures Related to Operations

Executive Summary

The coronavirus disease 2019 (COVID-19) pandemic continues to spread rapidly around the world with no approved treatment or vaccine. By July 16, 2020, the date of the second modification and extension of the No Sail Order, there were over 13 million confirmed cases and over 580,000 confirmed deaths worldwide. As of September 28, 2020, a cumulative total of over 33 million cases and almost 1 million confirmed deaths have now been reported worldwide. Even in countries that have managed to slow the rate of transmission, the risks for

COVID-19 resurgence remains. In the United States, as of September 28, 2020, there have been over 7 million cases and more than 200,000 confirmed deaths with over 300,000 new cases reported in the last 7 days.

Since HHS/CDC's original No Sail Order, signed on March 14, 2020, which suspended the embarkation of passengers, CDC has worked to control the spread of the virus associated with COVID-19 on cruise ships that remained in U.S. jurisdiction, while protecting against further introduction and spread of the virus associated with COVID-19 into U.S. communities. Cruise ships continue to be an unsafe environment with close quarters where the disease spreads easily and is not readily detected.

Cumulative CDC data from March 1 through September 28, 2020, show a total of 3,689 confirmed cases of COVID-19¹ or COVID-like illness² cases on cruise ships and 41 deaths. These data have also revealed a total of 102 outbreaks on 124 different cruise ships, meaning more than 82% of ships within U.S. jurisdiction were affected by COVID-19 during this time frame. In addition, four cruise ships still have ongoing or resolving COVID-19 outbreaks on board. Recent outbreaks on cruise ships overseas continue to demonstrate that reduced capacity alone has not diminished transmission.

The challenges described in this document highlight the need for further action prior to cruise ships safely resuming passenger operations in the United States. CDC supports the decision by the Cruise Line International Association (CLIA) and its members to voluntarily extend the suspension of operations for passenger cruise ship travel through October 31, 2020.³ CDC further supports the decisions of numerous cruise ship operators that have voluntarily canceled scheduled voyages involving U.S. ports beyond the date specified by CLIA, including Cunard,⁴ Crystal Cruises,⁵

¹ Confirmed COVID-19 means laboratory confirmation for presence of SARS-CoV-2, the virus that causes COVID-19, by polymerase chain reaction (PCR) testing.

² COVID-like illness means acute respiratory illness (ARI), influenza-like illness (ILI), or diagnosis of pneumonia.
