If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

## II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized as follows.

1. *The title of the information collection:* NRC Form 244, "Registration Certificate—Use of Depleted Uranium Under General License."

2. *OMB approval number:* 3150–0031.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* NRC Form 244.

5. *How often the collection is required or requested:* On occasion.

6. *Who will be required or asked to respond:* Persons who receive, acquire, possess, or use depleted uranium.

7. *The estimated number of annual responses:* 21.

8. *The estimated number of annual respondents:* 8.5.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 12.2 (8.5 reporting + 1.7 recordkeeping + 2 third-party disclosure).

10. *Abstract:* The NRC regulations in part 40 of title 10 of the *Code of Federal Regulations*, establishes requirements for the receipt, possession, use and transfer of radioactive source and byproduct materials. Section 40.25 established a general license authorizing the use of depleted uranium contained in industrial products or devices for the purpose of providing a concentrated mass in a small volume of the product or device. The NRC Form 244 is used to report the receipt and transfer of depleted uranium, as required by Section 40.25. The registration information required by the NRC Form 244 enables the NRC to make a determination on whether the possession, use, or transfer of depleted uranium source and byproduct material is in conformance with the NRC's

regulations for the protection of public health and safety. General licensees can also use NRC Form 244 to update any of the information contained in the form, once the form is authorized by the NRC.

## III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.

2. Is the estimate of the burden of the information collection accurate? Please explain your answer.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

**SUPPLEMENTARY INFORMATION:**

## I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, (10 CFR) “Final environmental impact statement—notice of availability,” the NRC is making available to the public NUREG–1437, Supplement 23, Second Renewal (the final SEIS) regarding the proposed subsequent renewal of Renewed Facility Operating License Nos. DPR–24 and DPR–27 for an additional 20 years for Point Beach. A notice of availability of the second draft report, which updated the 2021 draft SEIS, was published in the **Federal Register** on April 16, 2025 (90 FR 16008). The U.S. Environmental Protection Agency issued its notice of availability of the second draft report on April 18, 2025 (90 FR 16524). The public comment period on the second draft report ended on June 2, 2025, and the comments received on the second draft report, as well as on the 2021 draft SEIS, are addressed in the final SEIS.

## II. Discussion

The second draft report, which updated the 2021 draft SEIS, was issued for public comment. The final SEIS (NUREG–1437, Supplement 23, Second Renewal) addresses the comments received on the second draft report and on the 2021 draft SEIS. As discussed in Chapter 4 of the final SEIS, the NRC staff has determined that the adverse environmental impacts of subsequent license renewal for Point Beach (*i.e.*, the continued operation of Point Beach for a period of 20 years beyond the expiration dates of the current renewed operating licenses) are not so great that preserving the option of license renewal for energy-planning decision-makers would be unreasonable. This recommendation is based on: (1) information in the environmental report, as supplemented, and other documents submitted by NextEra Energy Point Beach, LLC; (2) the NRC staff’s consultation with Federal, State, Tribal, and local governmental agencies; (3) the NRC staff’s independent environmental review; and (4) the NRC staff’s consideration of public comments received during the scoping process and on the second draft report and the 2021 draft SEIS.

Dated: August 13, 2025.
