MARYSVILLE PM_{2.5} PLAN**
[Tons per winter season day]

Budget year	Oxides of nitrogen	PM _{2.5}
2017	5.3	0.2
2024	3.1	0.2

Receipt of the MVEBs in the Yuba City-Marysville PM_{2.5} Plan was announced on EPA's transportation conformity Web site on May 20, 2014. We received no comments in response to the adequacy review posting. The finding is available at EPA's transportation conformity Web site: <http://www.epa.gov/otaq/stateresources/transconf/adequacy.htm>.

Transportation conformity is required by Clean Air Act section 176(c). EPA's conformity rule requires that transportation plans, transportation improvement programs, and projects conform to SIPs and establishes the criteria and procedures for determining whether or not they do conform. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards.

The criteria by which we determine whether a SIP's MVEBs are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4) which was promulgated in our August 15, 1997 final rule (62 FR 43780, 43781–43783). We have further described our process for determining the adequacy of submitted SIP budgets in our July 1, 2004 final rule (69 FR 40004, 40038), and we used the information in these resources in making our adequacy determination. Please note that an adequacy review is separate from EPA's completeness review, and should not be used to prejudge EPA's ultimate approval action for the SIP. Even if we find a budget adequate, the SIP could later be disapproved.

SUPPLEMENTARY INFORMATION:

A. Purpose

The collection applies to the FAR requirements for a contractor code of business ethics and conduct, an internal control system, and disclosure to the Government of certain violations of criminal law, violations of the civil False Claims Act, or significant overpayments.

The 60 hour burden estimate reflects revisions resulting from public comments as reflected in the November 12, 2008, final rule (73 FR 67064). In response to public comments the Government stated the initial estimate of 3 hours was inadequate and revised the estimated burden hours to 60 per response. The change particularly considers the hours that would be required for the collection within a company, prior to release to the Government.

B. Annual Reporting Burden

Respondents: 276.
Responses per Respondent: 1.
Total Responses: 276.
Hours per Response: 60.
Total Burden hours: 16,560.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be

collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202–501–4755.
