##### II. Background

In the **Federal Register** of November 2, 2005 (70 FR 66392) (FRL-7739-7), EPA published a notice announcing its approach to field implementation of its Endangered Species Protection Program (ESPP). The goal of the ESPP is to carry out responsibilities under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) in compliance with the Endangered Species Act (ESA), while at the same time not placing unnecessary burden on agriculture and other pesticide users. The implementation approach will relay geographically specific pesticide use limitations to the pesticide user when necessary to protect listed species. All pesticide products EPA determines "may affect" a listed

species or their designated critical habitat, may be subject to the ESPP.

This public meeting will address ESPP program elements so that the public will understand EPA's overall approach to field implementation, what their responsibilities will be, under what circumstances EPA would be employing this approach, and the roles of other government agencies. The meeting will also provide an opportunity for the public to ask specific questions and receive answers.

##### III. Tentative Agenda

The tentative meeting agenda is outlined below, and the final agenda will be posted at <http://www.epa.gov/espp>, along with hotel information and meeting logistics.

1. Overview of Endangered Species Act (ESA) and Endangered Species Protection Program (ESPP).
2. Scope of ESPP.
3. Implementation process.
4. Label language and enforcement.
5. Endangered Species Protection Bulletins (Bulletins).
6. Public participation and the role of States and Tribes.
7. Implementation timing.

#### SUPPLEMENTARY INFORMATION:

##### A. Background

On March 22, 2004, EPA issued a final rule amending the municipal solid waste landfill criteria in 40 CFR part 258 to allow for research, development and demonstration (RD&D) permits. (69 FR 13242). This rule allows for variances from specified criteria for a limited period of time, to be implemented through state-issued RD&D permits. RD&D permits are only available in states with approved MSWLF permit programs which have been modified to incorporate RD&D permit authority. While States are not required to seek approval for this new provision, those States that are interested in providing RD&D permits to owners and operators of MSWLFs must seek approval from EPA before issuing such permits. Approval procedures for new provisions of 40 CFR part 258 are outlined in 40 CFR 239.12.

Wisconsin's MSWLF permit program was approved on November 20, 1996 (61 FR 59096). On November 8, 2005, Wisconsin applied for approval of its RD&D permit provisions. Wisconsin submitted its rules under NR 514.10 for review.

##### B. Decision

After a thorough review, U.S. EPA Region 5 is proposing that Wisconsin's RD&D permit provisions as defined under NR 514.10 are adequate to ensure compliance with the Federal criteria as defined at 40 CFR 258.4.

**Authority:** This action is issued under the authority of section 2002, 4005 and 4010(c) of the Solid Waste Disposal Act, as amended, 42 U.S.C. 6912, 6945 and 6949(a).

Dated: January 10, 2006.
