

There are two ways to become involved in the Commission's review of this application. First, any person wishing to obtain legal status by becoming a party to this proceeding should file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10) by the comment date, below. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to the project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentators will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentators will not be required to serve copies of filed documents on all other parties. However, the non-party commentators will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests,

and interventions via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (<http://www.ferc.gov>) under the "e-Filing" link. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

Comment Date: March 5, 2009.

Kimberly D. Bose,

Secretary.

[Project No. 2188-156]

PPL Montana, LLC; Notice of Availability of Environmental Assessment

February 12, 2009.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47879) the Office of Energy Projects has prepared an environmental assessment (EA) for an application filed by PPL Montana, LLC (licensee) on June 11, 2008, requesting Commission approval to construct numerous improvements at the Rainbow Development of the Missouri-Madison Hydroelectric Project (FERC No. 2188). The licensee proposes improvements that differ substantially from those analyzed during the relicensing of the project. Specifically, the licensee proposes to construct a new intake, power canal, powerhouse, and tailrace at the Rainbow Development. The project's Rainbow Development is located on the Missouri River northeast of the City of Great Falls, in Cascade County, Montana. The EA evaluates the environmental impacts that would result from approving the licensee's proposal. The EA finds that approval of the application would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is on file with the Commission and is available for public inspection. The EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number (P-2188) excluding the last three digits in the docket number field

to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at 1-866-208-3372, or for TTY, (202) 502-8659.

Federal Energy Regulatory Commission

[Docket No. CP95-35-001]

EcoEléctrica, L.P.; Notice of Availability of the Environmental Assessment for the Proposed EcoEléctrica Terminal Modification Project

February 13, 2009.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the liquefied natural gas (LNG) facilities proposed by EcoEléctrica, L.P. (EcoEléctrica) in the above-referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of EcoEléctrica's proposed Terminal Modification Project (Project). The Project would utilize a previously constructed natural gas pipeline at the existing EcoEléctrica LNG terminal that extends to the facility fence line where it would interconnect with Puerto Rico Electric Power Authority's (PREPA) facilities. The Project would also involve construction of:

- Two additional vertical shell and tube heat exchanger vaporizers;
- One fixed speed, in-tank LNG sendout pump;
