

past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an increase in the total respondent labor costs as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in cost estimates reflects updated labor rates available from the Bureau of Labor Statistics.

There is a slight decrease in the annual O&M cost from the previous ICR due to mathematical rounding. The previous ICR estimated an O&M cost of \$11,700, but rounded the figure to the nearest thousand, or \$12,000. This ICR presents a more accurate cost figure.

Title: NESHAP for Flexible Polyurethane Foam Production (Renewal)

ICR Numbers: EPA ICR Number 1783.06, OMB Control Number 2060-0357.

ICR Status: This ICR is scheduled to expire on June 30, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart III. Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Respondents/Affected Entities:

Owners or operators of flexible polyurethane foam product facilities

Estimated Number of Respondents: 132

Frequency of Response: Initially, occasionally, semiannually and annually

Estimated Total Annual Hour Burden: 9,047

Estimated Total Annual Cost: \$874,812, which includes \$874,812 in labor costs, no capital/startup costs, and no operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent. Therefore, the labor hours in the previous ICR reflect the current burden and are reiterated in this ICR; however, there is an increase in total labor costs to the respondents and the Agency due to an increase in labor rates. The increase is not due to any program changes.
