Notice of Removal of CIPS and RIMS From FERC Web Site

June 12, 2003.

Take notice that on July 11, 2003, the Federal Energy Regulatory Commission (FERC) will remove the Commission Issuance Posting System (CIPS) and the Records Information Management System (RIMS) from its Web site at <http://www.ferc.gov>.

CIPS contains Commission issuances in both WordPerfect and Text format. RIMS contains most documents submitted to or issued by FERC in image format. Both CIPS and RIMS were custom-designed systems with limited enhancement potential and they were increasingly difficult to maintain.

On August 2, 2002, FERC put into production the Federal Energy Regulatory Records Information System (FERRIS). FERRIS was designed to replace both CIPS and RIMS with a system based on current document management, database, and search engine technology.

FERC continued to make both RIMS and CIPS available on its Web site while users became familiar with FERRIS. However, no new documents were added to CIPS or RIMS after FERRIS was put in production. User surveys and web statistics show that usage of both CIPS and RIMS has declined since the introduction of FERRIS.

If you have questions on the termination of RIMS and CIPS, please contact Brooks Carter at (202) 502-8145 or brooks.carter@ferc.gov.

III. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, the Administrator may approve such a request.

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before December 16, 2003 or July 21, 2003 for EPA Registration numbers listed under **DATES**. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in the **Federal Register** of June 26, 1991 (56 FR 29362) (FRL-3846-4). Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a Data Call-In. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold, or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product. Exception to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in a Special Review action, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-7515-1]

Clean Water Act Section 303(d): Availability of List Decision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability and opportunity to comment.

SUMMARY: This notice announces the availability of EPA's decision identifying water quality limited segments and associated pollutants in Wisconsin to be listed pursuant to the Clean Water Act section 303(d)(2), and requests public comment. Section 303(d)(2) requires that states submit and EPA approve or disapprove lists of waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards and for which total maximum daily loads (TMDLs) must be prepared.

On May 19, 2003, EPA partially approved and partially disapproved Wisconsin's submittal. Specifically, EPA approved Wisconsin's listing of 596 waters, associated pollutants, and associated priority rankings. EPA disapproved Wisconsin's decision not to list ten water quality limited segments and associated pollutants. EPA identified these additional water bodies and pollutants along with priority rankings for inclusion on the 2002 section 303(d) list.

EPA is providing the public the opportunity to review its decision to add waters and pollutants to Wisconsin's 2002 section 303(d) list, as required by EPA's Public Participation regulations. EPA will consider public comments in reaching its final decision on the additional water bodies and pollutants identified for inclusion on Wisconsin's final list.

DATES: Comments on this document must be received in writing by July 21, 2003.

ADDRESSES: Written comments on today's notice may be submitted to Jo

Lynn Traub, Director, Water Division, Attn: Wisconsin 303(d) list, U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604. As an alternative, EPA will accept comments electronically. Comments should be sent to the following Internet Email Address: keclik.donna@epa.gov.

FOR FURTHER INFORMATION CONTACT:

Donna Keclik, Watersheds and Wetlands Branch, at the EPA address noted above or by telephone at (312) 886-6766.

SUPPLEMENTARY INFORMATION: Section 303(d) of the Clean Water Act (CWA) requires that each state identify those waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards. For those waters, states are required to establish TMDLs according to a priority ranking.

EPA's Water Quality Planning and Management regulations include requirements related to the implementation of section 303(d) of the CWA (40 CFR 130.7). The regulations require states to identify water quality limited waters still requiring TMDLs every two years. The lists of waters still needing TMDLs must also include priority rankings and must identify the waters targeted for TMDL development during the next two years (40 CFR 130.7). On March 31, 2000 EPA promulgated a revision to this regulation that waived the requirement for states to submit section 303(d) lists in 2000 except in cases where a court order, consent decree, or settlement agreement required EPA to take action on a list in 2000 (65 FR 17170).

Consistent with EPA's regulations, Wisconsin submitted to EPA its listing decision under section 303(d)(2) on November 4, 2002. On May 19, 2003, EPA approved Wisconsin's listing of 596 waters and associated priority rankings. EPA disapproved Wisconsin's decision not to list ten water quality limited segments and associated pollutants. EPA identified these additional waters and pollutants along with priority rankings for inclusion on the 2002 section 303(d) list. EPA solicits public comment on its identification of ten additional waters and associated pollutants for inclusion on Wisconsin's 2002 section 303(d) list.

Dated: June 12, 2003.

Timothy C. Henry,

Acting Director, Water Division, EPA Region 5.
