Maximizing Use of American-Made Goods, Products, and Materials (FAR Case 2019–016)

This final rule strengthens domestic preferences under the Buy American statute by making adjustments to the required percentage of domestic content and the existing percentages for the price evaluation preferences in an effort to decrease the amount of foreign-sourced content in a U.S. manufactured product to promote economic and national security, help stimulate economic growth, and create jobs. The price evaluation preferences increase from 6 percent to 20 percent for large business and from 12 percent to 30 percent for small business; for DoD procurements there is no change to the DoD 50 percent amount. The domestic content requirement for iron and steel increases from 50 percent to 95 percent; for other end products and construction materials, the domestic content requirement increases from 50 percent to 55 percent. Foreign iron and steel is iron or steel products that are not produced in the United States. The rule implements E.O. 13881, Maximizing Use of American-Made Goods, Products, and Materials. This final rule will not have a significant economic impact on a substantial number of small entities.
