[Project No. 2100-119 California]

California Department of Water Resources; Notice of Availability of Final Environmental Assessment

August 19, 2004.

In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Energy Regulatory Commission's (Commission or FERC) regulations (18 CFR Part 380), the Commission staff reviewed an application for amendment to the approved recreation plan for the Feather River Project (FERC Project No. 2100) and prepared a final environmental assessment (FEA) on the application. The project is located on the Feather River in Butte County, California, near the city of Oroville.

Specifically, the project licensee, the California Department of Water Resources, requested that the Commission amend the approved recreation plan for the project to allow shared use of certain recreational trails within the project boundaries. In the FEA, the Commission staff analyzes the probable environmental effects of the proposed amendment and concludes that the proposal should not be approved at this time.

The FEA is attached to a Commission order titled "Order Denying Request to Amend Recreation Plan," which was issued August 17, 2004, and is available for review in the Commission's Public Reference Room located at 888 First Street, NE., Room 2A, Washington, DC 20426. The FEA also may be viewed on the Commission's website (<http://www.ferc.gov>) using the "eLibrary" link. [Project No. 2090-003]

Green Mountain Power Corporation; Notice of Availability of Environmental Assessment

August 20, 2004.

In accordance with the National Environmental Policy Act of 1969 and part 380 of the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380; FERC Order No. 486 and 52 FR 47,897, the Office of Energy Projects Staff (staff) reviewed the application for a new license for the Waterbury Hydroelectric Project, located on the Little River in the town of Waterbury in Washington County, Vermont, and prepared an environmental assessment (EA) for the project. The project does not use or occupy any federal facilities or lands.

In this EA, the staff analyzes the potential environmental effects of the existing project and concludes that licensing the project, with staff's recommended measures, would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link.
