

B. How and to whom do I submit comments?

You may submit comments as provided in the **ADDRESSES** section. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment and with any disk or CD ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the www.regulations.gov Web site to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an "anonymous access" system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment. In contrast to EPA's electronic public docket, EPA's electronic mail (email) system is not an "anonymous access" system. If you send an email comment directly to the Docket without going through www.regulations.gov, your email address is automatically captured and included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

Dated: June 19, 2012.

Lorie J. Schmidt,

Associate General Counsel.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection Approved by the Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice of public information collection approved by the Office of Management and Budget.

SUMMARY: The Federal Communications Commission has received the Office of Management and Budget (OMB) approval for the following public information collection(s) pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). An agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number, and no person is required to respond to a collection of information unless it displays a currently valid OMB control number.

FOR FURTHER INFORMATION CONTACT: Jane C. Kelly, Jane.Kelly@fcc.gov, or by phone on (202) 418-2832.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1003.

OMB Approval Date: June 8, 2012.

Expiration Date: June 30, 2015.

Title: Communications Disaster Information Reporting System (DIRS).

Form No.: Not applicable.

Number of Respondents/Responses: 6,750 respondents; 6,750 responses.

Estimated Time per Response: 0.1-0.50 hours.

Total Annual Burden: 4,725.

Total Annual Cost: None.

Obligation To Respond: Voluntary.

The statutory authority for this collection is contained in 47 U.S.C. 154(i), 218, 303(r) of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: The Commission acknowledges and agrees that is consistent with the primary objective of the DIRS to treat filings as confidential. We will work with respondents to ensure that their concerns regarding the confidentiality of DIRS filings are resolved in a manner consistent with Commission rules.

Needs and Uses: The Commission submitted this information collection to the Office of Management and Budget (OMB) as a revision and received a three year approval from OMB for the collection.

In response to the events of September 11, 2001, the Federal Communications Commission (Commission or FCC) created an Emergency Contact Information System to assist the Commission in ensuring rapid restoration of communications capabilities after disruption by a terrorist threat or attack, and to ensure that public safety, public health, and other emergency and defense personnel have effective communications services available to them in the immediate aftermath of any terrorist attack within

the United States. The Commission submitted, and OMB approved, a collection through which key communications providers could voluntarily provide contact information.

The Commission's Public Safety and Homeland Security Bureau (PSHSB) updated the Emergency Contact Information system with a Disaster Information Reporting System (DIRS) that uses electronic forms to collect Emergency Contact Information forms and through which participants may inform the Commission of damage to communications infrastructure and facilities and may request resources for restoration. The Commission updated the process by increasing the number of reporting entities to ensure inclusion of wireless, wireline, broadcast, cable and satellite communications providers.

In recent years, communications have evolved from a circuit-switched network infrastructure to broadband networks. The Commission is seeking to extend the Disaster Information Reporting System to include interconnected Voice over Internet Protocol and broadband Internet Service Providers. Increasing numbers of consumers, businesses, and government agencies rely on broadband and interconnected VoIP services for everyday and emergency communications needs, including vital 9-1-1 services. It is therefore imperative that the Disaster Information Reporting System be expanded to include these new technologies in order for the Commission the gain an accurate picture of communications landscape during disasters. Therefore, the Commission has revised its DIRS screen shots and is including a copy of the DIRS user manual for which the Commission has received OMB approval on June 8, 2012.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[AU Docket No. 12-25; DA 12-947]

Mobility Fund Phase I Auction Supplemental Short-Form Instructions and Other Information

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In this document, the Commission's Wireless Telecommunications and Wireline

Competition Bureaus provide supplemental filing instructions for the Mobility Fund Phase I Auction for completing FCC Form 180, announce the availability of certain updated files and provide other information regarding Auction 901.

DATES: Short-Form applications are due prior to 6 p.m. on July 11, 2012.

FOR FURTHER INFORMATION CONTACT:

Wireless Telecommunications Bureau, Auctions and Spectrum Access Division: For Mobility Fund Phase I supplemental filing instructions: Lisa Stover at (717) 338-2868.

SUPPLEMENTARY INFORMATION: This is a summary of the *Mobility Fund Phase I Supplemental Public Notice* (Supplemental Filing Instructions Public Notice) released on June 15, 2012. The *Supplemental Filing Instructions Public Notice* and its associated attachment as well as related Commission documents may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc. (BCPI), 445 12th Street SW., Room CY-B402, Washington, DC 20554, telephone 202-488-5300, fax 202-488-5563, or you may contact BCPI at its Web site: <http://www.BCPIWEB.com>. When ordering documents from BCPI, please provide the appropriate FCC document number, for example, DA 12-947. The *Supplemental Filing Instructions Public Notice* and related documents also are available on the Internet at the Commission's Web site: <http://wireless.fcc.gov/auctions/901/> or by using the search function for AU Docket No. 12-25 on the Commission's Electronic Comment Filing System (ECFS) Web page at <http://www.fcc.gov/cgb/ecfs/>.

1. On May 2, 2012, the Wireless Telecommunications Bureau and Wireline Competition Bureau (the Bureaus) announced the procedures for the Mobility Fund Phase I auction scheduled for September 27, 2012 (Auction 901). The Bureaus provide supplemental filing instructions for completing FCC Form 180, announce the availability of certain updated files, and provide additional information regarding certain details of Auction 901.

Short-Form Application (FCC Form 180) Filing Instructions

2. In the *Auction 901 Procedures Public Notice*, 77 FR 32092, May 31, 2012, the Bureaus provided general instructions for completing FCC Form 180 and stated that they would provide additional information about accessing, completing, and viewing the FCC Form 180 in a separate public notice. The

instructions provided in Attachment A to the *Supplemental Filing Instructions Public Notice* supplement those contained in the *Auction 901 Procedures Public Notice*.

Updated Files

3. In the *Auction 901 Procedures Public Notice*, the Bureaus identified census blocks eligible for the Mobility Fund Phase I support to be offered in Auction 901. The Bureaus also released files containing detailed information about these census blocks. In the *Auction 901 Additional Data Formats Public Notice*, (DA 12-721 released May 8, 2012) the Bureaus announced the availability of an additional file with information about the biddable geographic areas for Auction 901. In the *Supplemental Filing Instructions Public Notice*, the Bureaus announce the availability of updated versions of some of these files, which are available via the link for *Attachment A Files* at <http://wireless.fcc.gov/auctions/901/>. Specifically, the *Biddable Items* file, the *All Eligible Census Blocks* file, and five of the state spreadsheets have been updated. In the *Biddable Items* file, the header of one of the columns has been changed from *Pop10* to *Population*, and the header of another column has been changed from *Tribal Area* to *Tribal Land*. These changes were made to be more consistent with how the data will be presented in the FCC Auction System. Additionally some of the entries in the *Tribe* and *Tribal Land* columns have been changed. In the previous version of the file, the name of any tribe or Tribal land that should have included an apostrophe erroneously included two apostrophes. The new file fixes this.

4. The apostrophe anomaly also affected the *All Eligible Census Blocks* file and five of the state spreadsheets. Consequently, the *All Eligible Census Blocks* file and the state spreadsheets for Alaska, Arizona, Idaho, Michigan, and Montana have been revised.

Additional Details for Determining Winning Bids

5. In the *Auction 901 Procedures Public Notice*, the Bureaus described the approach they would use to determine winning bids, including procedures to ensure that at most one bid per geographic area is awarded, the use of random numbers to address tied bids, and the Bureaus procedures when remaining funds are insufficient to support the next lowest bid. The Bureaus clarify those procedures, in particular with respect to the Bureaus use of random selection numbers, so that funds may be used to support new

service to as many road miles as possible within the Bureaus' \$300 million budget.

6. For each submitted bid, the Bureaus will assign a random selection number, which they will use in two ways: To break any tied bids for the same area, and to establish an order in which they will assign bids with the same dollars per road mile amount for different areas when the remaining funds are insufficient to award support to all the bids in that amount. The Bureaus will also calculate a gross dollar support amount associated with the bid, equal to the gross bid amount times the number of qualifying road miles in the area. To ensure that they award support to at most one bid per geographic area, the Bureaus will first compare net bids (taking into account bidding credits where applicable) for each biddable area, and for each area, retain the lowest net bid for further consideration. If there are ties for the lowest bid for an area, the Bureaus will retain the bid with the highest selection number.

7. To select winning bids, the Bureaus will then compare the retained bids for all areas by sorting them in ascending order of net bid amount (dollars per road mile) and descending order of selection number. The Bureaus will award support to bids in this order, starting with the lowest bid/highest selection number, as long as remaining funds are sufficient to cover the gross dollar support amount of the bid. If a bid cannot be awarded because its gross dollar support would exceed the remaining funds, the Bureaus will skip the bid and consider the next lowest bid/highest selection number, awarding as much support as possible within the Bureaus' \$300 million budget.

Federal Communications Commission.

Gary Michaels,

Deputy Chief, Auctions and Spectrum Access Division, WTB.
