Notice of Availability: Environmental Assessment and Draft Amended Oil and Gas Industry Conservation Plan for the American Burying Beetle in Oklahoma

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of documents; request for public comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of an environmental assessment (EA), under the National Environmental Policy Act of 1969, that evaluates the impacts of a draft amendment to the Oil and Gas Industry Conservation Plan (ICP) for incidental take of the federally listed American burying beetle resulting from oil and gas industry activities. The original ICP (2014 ICP) was approved on May 21, 2014. The proposed amendment to the ICP will extend by 3 years the periods for sign-up, submission of individual project plans (IPPs), project construction, and ICP/permit duration. It also will provide date-certain deadlines, which will reduce confusion and simplify tracking for both permittees and the Service. In addition, we propose to delete language that limits coverage to projects that are fully contained within the ICP planning area. There is no change to the covered species, total amount of take authorized, or the planning area, which consists of 45 counties in Oklahoma. Individual oil and gas companies would continue to apply for Endangered Species Act

permits for incidental take and agree to comply with the terms and conditions of the ICP.

DATES: To ensure consideration, written comments must be received or postmarked on or before April 7, 2016. Any comments we receive after the closing date or not postmarked by the closing date may not be considered in the final decision on this action.

FOR FURTHER INFORMATION CONTACT:

Jonna Polk, Field Supervisor, by U.S. mail at the U.S. Fish and Wildlife Service, Oklahoma Ecological Services Field Office, 9014 E. 21st St., Tulsa, OK 74129; or by phone at 918-581-7458.

SUPPLEMENTARY INFORMATION: Under the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*), this notice advises the public that we, the Service, have gathered the information necessary to determine impacts of the EA and draft amendment to the ICP related to the proposed issuance of incidental take permits (ITPs) under section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended (ESA), to oil and gas companies (applicants) who agree to the conditions in the draft amended ICP. The ICP is a habitat conservation plan

(HCP) that covers take of the American burying beetle (ABB) in Oklahoma that is incidental to covered activities associated with geophysical exploration (seismic), development, extraction, or transport of crude oil, natural gas, and/or other petroleum products, as well as maintenance, operation, repair, and decommissioning of oil and gas pipelines and well field infrastructure, and will include measures necessary to minimize and mitigate impacts to the covered species and its habitat to the maximum extent practicable.

The Service plans to amend the ICP to cover several changes. We plan to (1) extend the timeframe for oil and gas companies (industry) to apply for participation in the ICP; (2) extend the expiration date of the ICP and permits by 3 years; (3) extend the construction period to 3 years after permit issuance and approval of individual project plans (IPP); (4) extend operations and management coverage to the permit expiration date; (5) provide date-certain limits for each period to help industry and the Service simplify record-keeping; and (6) remove requirements that all projects must be completely within the planning area. Removing the restriction will expand the type of activities to include pipelines from other areas.

Under the proposed amendment there are no proposed changes to the federally listed species. The American burying beetle (ABB) is the only species covered for incidental take in the draft amended ICP, and the total amount of take has not been increased. There are no changes to the process for applying for an incidental take permit or submission of individual project plans (IPPs), other than the removal of the requirement for the project to be entirely contained within the covered area. There are no changes to the covered area, which consists of the following 45 Oklahoma counties: Adair, Atoka, Bryan, Carter, Cherokee, Choctaw, Cleveland, Coal, Craig, Creek, Delaware, Garvin, Haskell, Hughes, Johnson, Kay, Latimer, Le Flore, Lincoln, Love, Marshall, Mayes, McClain, McCurtain, McIntosh, Murray, Muskogee, Noble, Nowata, Okfuskee, Okmulgee, Osage, Ottawa, Pawnee, Payne, Pittsburg, Pontotoc, Pottawatomie, Pushmataha, Rogers, Seminole, Sequoyah, Tulsa, Wagoner, and Washington.

The 2014 ICP allows industry to apply for a permit to participate for the first two years from the date of approval and signature—May 21, 2014. Construction is allowed for the first 2 years, and operations and maintenance for up to an additional 20 years. The estimates of potential impacts from industry activities for the ICP were based on
