#### I. Background

In accordance with section 51.118 of title 10 of the Code of Federal Regulations, (10 CFR) "Final environmental impact statement notice of availability," the NRC is making available to the public NUREG-1437, Supplement 23, Second Renewal (the final SEIS) regarding the proposed subsequent renewal of Renewed Facility Operating License Nos. DPR-24 and DPR-27 for an additional 20 years for Point Beach. A notice of availability of the second draft report, which updated the 2021 draft SEIS, was published in the Federal Register on April 16, 2025 (90 FR 16008). The U.S. Environmental Protection Agency issued its notice of availability of the second draft report on April 18, 2025 (90 FR 16524). The public comment period on the second draft report ended on June 2, 2025, and the comments received on the second draft report, as well as on the 2021 draft SEIS, are addressed in the final SEIS.

#### II. Discussion

The second draft report, which updated the 2021 draft SEIS, was issued for public comment. The final SEIS (NUREG-1437, Supplement 23, Second Renewal) addresses the comments received on the second draft report and on the 2021 draft SEIS. As discussed in Chapter 4 of the final SEIS, the NRC staff has determined that the adverse environmental impacts of subsequent license renewal for Point Beach (i.e., the continued operation of Point Beach for a period of 20 years beyond the expiration dates of the current renewed operating licenses) are not so great that preserving the option of license renewal for energy-planning decision-makers would be unreasonable. This recommendation is based on: (1) information in the environmental report, as supplemented, and other documents submitted by NextEra Energy Point Beach, LLC; (2) the NRC staff's consultation with Federal, State, Tribal, and local governmental agencies; (3) the NRC staff's independent environmental review; and (4) the NRC staff's consideration of public comments received during the scoping process and on the second draft report and the 2021 draft SEIS.

Dated: August 13, 2025.

For the Nuclear Regulatory Commission.

# B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (https://www.regulations.gov). Please include Docket ID NRC-2024-0220, in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <a href="https://www.regulations.gov">https://www.regulations.gov</a> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment

submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADĀMS.

# II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized as follows.

- 1. The title of the information collection: Domestic Licensing of Source Material.
  - 2. OMB approval number: 3150-0020.
  - 3. Type of submission: Extension.
- 4. The form number, if applicable: Not applicable.
- 5. How often the collection is required or requested: Reports required under 10 CFR part 40 are collected and evaluated on a continuing basis as events occur. There is a one-time submittal of information to receive a license. Renewal applications need to be submitted every 15 to 40 years. Information in previous applications may be referenced without being resubmitted. In addition, recordkeeping must be performed on an on-going basis.
- 6. Who will be required or asked to respond: Applicants for and holders of NRC licenses authorizing the receipt, possession, use, or transfer of radioactive source material.
- 7. The estimated number of annual responses: 1,516 (698 reporting responses + 813 recordkeeping responses + 5 third-party disclosure responses).
- 8. The estimated number of annual respondents: 812.
- 9. The estimated number of hours needed annually to comply with the information collection requirement or request: 18,469 (12,087 hours reporting + 6,367 hours recordkeeping + 15 hours third-party disclosure).
- 10. Abstract: The NRC regulations in 10 CFR part 40 establish procedures and criteria for the issuance of licenses to receive title to, receive, possess, use, transfer, or deliver source and byproduct material. The application, reporting, recordkeeping, and thirdparty notification requirements are necessary to permit the NRC to make a determination as to whether the possession, use, and transfer of source and byproduct material is in conformance with the Commission's regulations for protection of public health and safety.

#### III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

- 1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.
- 2. Is the estimate of the burden of the information collection accurate? Please explain your answer.
- 3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
- 4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: August 13, 2025.

For the Nuclear Regulatory Commission. David Cullison
