SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216). Section 104(c)(6) provides for photography for educational or commercial purposes involving non-endangered and non-threatened marine mammals in the wild.

Dr. Kunnasranta requests a three-year photography permit to film the freshwater harbor seal population at Lake Iliamna, Alaska. Filmmakers plan to obtain footage using digital and full high definition video and still cameras with telephoto lenses from several platforms: single or twin engine survey aircrafts, small vessels, or from shore. Additional footage may be obtained from static, digital cameras placed onshore and anchored underwater. Filming would take place for approximately one week between spring and fall annually, most likely during the seals' molt period in summer, after pupping; up to 280 seals may be

approached and filmed annually. Obtained footage will be part of an international documentary film presenting the world's other freshwater seal species, to be published in Europe.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: March 31, 2014.
