

circulating in birds were reported in a country with no official confirmation of avian cases (that would normally trigger a USDA ban), HHS/CDC could implement restrictions on an emergency basis.

Public Comment #2: The second comment was not specific for HPAI, but addressed general concerns about potentially zoonotic diseases associated with wild birds. The commenter urged CDC to reconsider rescinding this order with respect to live birds and to review the disease risks created by these bird imports to protect people from dangerous infectious diseases.

CDC Response: The current embargo on birds and bird products from countries that have had HPAI identified in poultry is very specific and does not cover all potentially zoonotic diseases from imported wild birds. Therefore, rescinding the current order would have neither an adverse nor a positive affect on the zoonotic risks of importing wild birds.

Public Comment #3: The third comment was in support of CDC's rescission of its bird embargo.

CDC Response: As stated above, CDC will continue to work closely with USDA and other human and animal health partners to monitor the situation with HPAI in both birds and people to protect both animal and human health in the United States.

In summary, HHS/CDC believes that the actions taken to date by USDA/APHIS adequately mitigate the human health risks of HPAI associated with birds and unprocessed bird products imported from the countries of concern. HHS/CDC plans to mitigate any future human health risks that are not adequately addressed by USDA/APHIS regulations, thus ensuring a strong coordinated federal response. Therefore, the HHS/CDC order of February 4, 2004, and its subsequent amendments are no longer needed.

Action

SUPPLEMENTARY INFORMATION:

Background and Purpose

The offshore supply vessel CALLAIS NAVIGATOR will be used for offshore supply operations. The Certificate of Alternative Compliance allows for the horizontal distance between the forward and aft masthead lights to be 20' 8⁵/₈". Placing the aft masthead light at the horizontal distance from the forward masthead light as required by Annex I, paragraph 3(a) of the 72 COLREGS, and Annex I, section 84.05(a) of the Inland Rules Act, would result in an aft masthead light location directly over the cargo deck, where it would interfere with loading and unloading operations. The offset from centerline of the RAM/NUC lights may be 3'. Offsetting the RAM/NUC lights 2 meters from the centerline as required by Annex I paragraph 3(c) and Annex I, section 84.05(c) would place them in an exposed position beyond the width of the aft end of the pilothouse.

The Certificate of Alternative Compliance allows for the horizontal separation of the forward and aft masthead lights to deviate from the requirements of Annex I, paragraph 3(a) of 72 COLREGS, and Annex I, section 84.05(a) of the Inland Rules Act, as well as the offset of the RAM/NUC lights to deviate from the requirements of Annex I, paragraph 3(c) of 72 COLREGS and Annex I, section 84.05(c) of the Inland Rules Act.

This notice is issued under authority of 33 U.S.C. 1605(c), and 33 CFR 81.18.

Dated: July 27, 2009.
