

Under APHIS' regulations, no person may move giant salvinia into or through the United States, or interstate, unless he or she obtains a permit for the movement from APHIS.

Because current efforts to eradicate giant salvinia in the Toledo Bend Reservoir and the surrounding areas in Louisiana and eastern Texas have been unsuccessful, APHIS has evaluated additional control methods available to help eradicate this noxious weed. These control methods include:

- An integrated control approach utilizing herbicides and mechanical, biological, and regulatory controls.
- A biological control program that requires no herbicide application.

APHIS' review and analysis of the potential environmental impacts associated with these control methods are documented in detail in an environmental assessment (EA) entitled, "Demonstration Project: Giant Salvinia, Toledo Bend Reservoir and Surrounding Areas in Louisiana and Eastern Texas" (March 2001).

The EA may be viewed on the Internet at <http://www.aphis.usda.gov/ppd/es/ppqdocs.html>. You may request paper copies of the EA by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the title of the EA when requesting copies. The EA is also available for review in our reading room (information on the location and hours of the reading room is provided under the heading **ADDRESSES** at the beginning of this notice).

The EA has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 18th day of July 2001.
