Riverbank Hydro No. 14, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On May 2, 2011, Riverbank Hydro No. 14, LLC (Riverbank Hydro), filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Tuttle Creek Hydroelectric Project (Tuttle Creek Project or project) to be located at the U.S. Army Corps of Engineers' (Corps) Tuttle Creek Dam, on Big Blue River, near Manhattan, Riley County, Kansas. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A 350-foot-long, 16-foot-diameter penstock bifurcating from the existing outlet structure; (2) a 100-foot-long, 50-foot-wide concrete powerhouse containing one turbine with a generator rating of 7.9 megawatts; (3) a tailrace structure directing flows from the powerhouse back into the river channel downstream of the existing dam; (4) a 2.8-mile-long, 25-kilovolt transmission line connecting the project to an existing transmission line; and (5) appurtenant facilities. The estimated annual generation of the Tuttle Creek Project would be 30.5 gigawatt-hours.
