#### National Library of Medicine; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* National Library of Medicine Special Emphasis Panel; G08-R01-R21.

*Date:* October 15, 2007.

*Time:* 1 p.m. to 4:30 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Library of Medicine, 6705 Rockledge Drive, Suite 301, Bethesda, MD 20817 (Telephone Conference Call).

*Contact Person:* Zoe E. Huang, MD, Health Scientific Administrator, Extramural Programs, National Library of Medicine, Rockledge 1 Building, 6705 Rockledge Drive, Suite 301, Bethesda, MD 20892-7968, 301-594-4937, [huangz@mail.nih.gov](mailto:huangz@mail.nih.gov).

*Name of Committee:* Biomedical Library and Informatics Review Committee.

*Date:* November 6-7, 2007.

*Time:* November 6, 2007, 8 a.m. to 6 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Library of Medicine, Building 38, 2nd Floor, Board Room, 9000 Rockville Pike, Bethesda, MD 20894.

*Time:* November 7, 2007, 8 a.m. to 2 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Library of Medicine, Building 38, 2nd Floor, Board Room, 9000 Rockville Pike, Bethesda, MD 20894.

*Contact Person:* Arthur A. Petrosian, PhD, Scientific Review Administrator, Division of Extramural Programs, National Library of Medicine, 6705 Rockledge Drive, Suite 301, Bethesda, MD 20892-7968, 301-496-4253, [petrosia@mail.nih.gov](mailto:petrosia@mail.nih.gov).

Any interested person may file written comments with the committee by forwarding the statement to the contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

### National Institutes of Health

#### Prospective Grant of Exclusive License: FDA Cleared Pediatric Cancer Diagnostics and Prognostics

**AGENCY:** National Institutes of Health, Public Health Service, HHS.

**ACTION:** Notice.

**SUMMARY:** This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(I), that the National Institutes of Health (NIH), Department of Health and Human Services, is contemplating the grant of an exclusive license to practice the invention embodied in Patent Applications U.S. 10/133,937, filed 04/25/2002, entitled "Methods for Analyzing High Dimensional Data for Classifying, Diagnosing, Prognosticating and/or Predicting Diseases and Other Biological States"; and U.S. 10/159,563, filed 05/31/2002, entitled "Selections of Genes And Methods of Using The Same For Diagnosis And For Targeting The Therapy of Select Cancers"; to Althea Technologies, Inc. having a place of business in San Diego, California. The patent rights in this invention have been

assigned to the United States of America (PHS ref E-324-2001/0,1).

**DATE:** Only written comments and/or application for a license that are received by the NIH Office of Technology Transfer on or before October 29, 2007 will be considered.

**ADDRESS:** Requests for a copy of the patent application, inquiries, comments and other materials relating to the contemplated license should be directed to: Cristina Thalhammer-Reyero, Ph.D., M.B.A., Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; e-mail: [ThalhamC@mail.nih.gov](mailto:ThalhamC@mail.nih.gov); Telephone: 301-435-4507; Facsimile: 301-402-0220.

**SUPPLEMENTARY INFORMATION:** The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within 60 days from the date of this published Notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The invention relates to a method of using supervised pattern recognition methods for classifying, diagnosing, predicting, or prognosticating various diseases. The method includes obtaining high dimensional experimental data, such as gene expression profiling data, filtering the data, reducing the dimensionality of the data through use of one or more methods, training artificial neural networks (ANN, a supervised pattern recognition method), ranking individual data points from the data, choosing multiple data points from the data based on the relative ranking, and using the multiple data points to determine if an unknown set of experimental data indicates a diseased condition, a predilection for a diseased condition, or a prognosis about a diseased condition. Further, the invention relates to sets of genes expressed in cancer cells that function to characterize each cancer type, and methods of using the sets of genes for diagnosis and for targeting the therapy of selected cancers. In particular, the methods apply to classify cancers which often present diagnostic dilemmas in clinical practice, such as the pediatric small round blue cell tumors (SRBCTs), including neuroblastoma (NB), rhabdomyosarcoma (RMS), Burkitt's lymphoma (BL), and the Ewing family of tumors (EWS). Specifically, the invention is an application of ANNs for
