#### II. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)).

This program ensures that information is in the desired format, reporting burden (time and costs) is minimized, collection instruments are understandable, and OSHA's estimate of the information-collection burden is correct. The Occupational Safety and Health Act of 1970 (the Act) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

Paragraph (b)(3) of the Standard specifies that systems have nameplates if required, and that these nameplates "be permanently attached to the system (as specified by paragraph (b)(3)(ii)(j)) so as to be readily accessible for inspection \* \* \*." In addition, this paragraph requires that markings on containers and systems covered by paragraphs (c) ("Systems utilizing stationary, nonrefrigerated storage containers"), (f) ("Tank motor vehicles for the transportation of ammonia"), (g) ("Systems mounted on farm vehicles other than for the application of ammonia"), and (h) ("Systems mounted on farm vehicles for the application of ammonia") provide information regarding nine specific characteristics of the containers and systems. Similarly, paragraph (b)(4) of the Standard specifies that refrigerated containers be marked with a nameplate on the outer covering in an accessible place which provides information regarding eight specific characteristics of the container.

The required markings ensure that employers use only properly designed and tested containers and systems to store anhydrous ammonia, thereby, preventing accidental release of, and exposure of employees to, this highly toxic and corrosive substance. In addition, these requirements provide the most efficient means for an OSHA compliance officer to ensure that the containers and systems are safe.

#### III. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information-collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information-collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information-collection and -transmission techniques.

#### IV. Proposed Actions

OSHA is proposing to decrease the existing burden-hour estimate, and to extend the Office of Management and Budget's (OMB) approval, of the collection-of-information requirements specified in paragraphs (b)(3) and (b)(4) of the Standard on the Storage and Handling of Anhydrous Ammonia. In this regard, the Agency is proposing to

decrease the current burden-hour estimate from 2,500 hours to 345 hours, for a total adjustment decrease of 2,155 burden hours.

OSHA will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to extend the approval of these information collection requirements.

*Type of Review:* Extension of a currently-approved information collection.

*Title:* Storage and Handling of Anhydrous Ammonia (29 CFR 1910.111).

*OMB Number:* 1218-0208.

*Affected Public:* Business or other for-profit; not-for-profit institutions; farms; Federal government; State, local or tribal governments.

*Number of Respondents:* 2,030.

*Frequency:* On occasion.

*Average Time per Response:* 10 minutes (.17 hours).

*Estimated Total Burden Hours:* 345 hours.

*Estimated Cost (Operation and Maintenance):* \$0.
