**Abstract:** The authority for EPA's oil pollution prevention requirements is derived from section 311(j)(1)(C) of the Clean Water Act, as amended by the Oil Pollution Act of 1990. EPA's regulation is codified at 40 CFR part 112. An SPCC Plan will help an owner or operator identify the necessary procedures, equipment and resources to respond to prevent an oil spill and to respond to an oil spill in a timely manner. If implemented effectively, the SPCC Plan is expected to prevent oil spills and reduce the impact and severity of oil spills. Although the owner or operator is the primary data user, EPA may also require the owner or operator to submit data to the Agency in certain situations to ensure facilities comply with the SPCC regulation and to help allocate response resources. State and local governments may use the data, which are not generally available elsewhere and can assist local emergency preparedness planning efforts. EPA does not require an owner or operator to submit SPCC Plans, but may request the SPCC Plan during a facility inspection or an oil spill incident for review. The SPCC regulation requires the owner or operator maintain a complete copy of the Plan at the facility if the facility is normally attended at least four hours per day or at the nearest field office if the facility is not so attended. The rule also requires that the Plan be available to the Regional Administrator for on-site review during normal working hours (40 CFR 112.3(e)).

**Form Numbers:** None.

**Respondents/affected entities:** Private facilities, State/Local/Tribal governments.

**Respondent's obligation to respond:** Mandatory per 40 CFR part 112.

**Estimated number of respondents:** 670,048 (total).

**Frequency of response:** Less than once per year.

**Total estimated burden:** 8,798,928 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$987,220,025, includes \$186,674,814 annualized capital or operation and maintenance costs.

**Changes in the Estimates:** Differences in burden and costs from the previous ICR are attributed to adjustments for wage rates, unit costs, and the projected universe of facilities.

### Mandatory Reporting of Greenhouse Gases: Notice of Data Availability Regarding Global Warming Potential Values for Certain Fluorinated Greenhouse Gases and Fluorinated Heat Transfer Fluids

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of data availability and request for comment.

**SUMMARY:** The EPA is announcing to the public the availability of estimated global warming potentials, as well as data and analysis submitted in support of them, for eight fluorinated heat transfer fluids. We are requesting comments on the estimated global warming potentials and the data and analysis supporting them. We are also requesting comment on the cited global warming potentials for 35 other fluorinated greenhouse gases and fluorinated heat transfer fluids for which we do not currently possess supporting data and analysis. The EPA is requesting comment on the global warming potentials of all 43 chemicals as we consider adding these global warming potentials to the Greenhouse Gas Reporting rule.

**DATES:** Comments must be received on or before May 6, 2013.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2009-0927, by one of the following methods:
