SUPPLEMENTARY INFORMATION:

Title: Veterinary Services Customer Service Survey.

OMB Number: 0579–0334.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture, among other things, regulates and provides services related to the importation, interstate movement, and exportation of animals, animal products, and other articles to prevent the spread of pests and diseases of livestock. APHIS' Veterinary Services (VS) is the program unit that carries out these activities to protect animal health.

After performing a service for an individual or business, VS conducts a survey to evaluate its customer service. The survey consists of a short questionnaire in which respondents are asked to identify the type of customer they are (e.g., pet owners, farm owners, animal/animal product producer, animal importer/exporter), and then to rate the services received in terms of courtesy, timeliness, helpfulness, etc. Respondents are also asked to rate and provide comments concerning their overall experience. Completion of the questionnaire is voluntary and responses do not identify the individual respondent.

VS uses the information collected to identify areas in which VS can improve service delivery to the public and more efficiently meet the needs and expectations of customers.

We are asking Office of Management and Budget (OMB) to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.083 hours per response.

Respondents: Members of the public who receive services from Veterinary Services.

Estimated annual number of respondents: 2,500.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 2,500.

Estimated total annual burden on respondents: 208 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 18th day of July 2013.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF AGRICULTURE**Animal and Plant Health Inspection Service****[Docket No. APHIS–2010–0100]****Environmental Impact Statement; Proposed Cattle Fever Tick Control Barrier in South Texas****AGENCY:** Animal and Plant Health Inspection Service, USDA.**ACTION:** Notice of availability of a draft environmental impact statement; request for comments.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has prepared a draft environmental impact statement (DEIS) to analyze the effects that may result from installing game fencing as a barrier to keep animals that carry cattle fever ticks and southern cattle ticks out of areas which are free of them and which are beyond the permanent tick quarantine zone in South Texas. We are seeking public comment on the DEIS and our evaluation of the alternatives we have identified as they relate to potential effects on the human environment.

DATES: We will consider all comments that we receive on or before August 30, 2013.
