

regimes than those covered in the document, and thus may have different sensitivity to DO concentrations. In addition, effects of hypoxia may vary latitudinally, or site-specifically, particularly as reproductive seasons determine exposure risks for sensitive early life stages. For these reasons, an environmental risk manager would need to carefully evaluate water quality and biological conditions within the specific location and decide if the Virginian Province criteria would apply or if region- or site-specific considerations would need to be made.

Endangered or Threatened Species Policy Recommendations

When a threatened or endangered species occurs at a site and sufficient data are available to indicate that it is sensitive at concentrations above the recommended criteria, it would be appropriate to consider deriving site-specific DO criteria.

Future Implementation Information and Applications

In the future additional information will be provided that will specifically address implementation issues. In the current document, implementation issues are discussed in a more general manner, summarizing important issues that environmental managers should consider in adopting and implementation of DO water quality standards. The future implementation information will provide more detailed discussion of implementation issues by using real world example data sets where possible, or hypothetical data sets that show users how to integrate their data and management goals. Application of this guidance to marine waters outside the Virginian Province may also be discussed. As a component of the implementation guidance, EPA originally envisioned publishing a visual basic-based computer program that would allow States and other users to derive DO criteria to meet the larval recruitment protection goal for coastal and estuarine animals. However, the recent revisions in the criteria (*i.e.*, the use of multiple species in the larval recruitment model) has precluded use of the visual basic model in its current format. Therefore, the model when available will likely be provided as a spreadsheet application compatible with commonly used software packages. EPA anticipates providing the additional implementation guidance in late 2001.

EPA believes the approach used to develop the criteria can be applied, with minor modifications and regional specific data, to derive DO criteria for

other coastal and estuarine regions of the United States. Therefore, in the future EPA plans to prepare similar DO criteria for other provinces based on this approach. At such time, EPA intends to publish a Notice of Data Availability and formally request submission of data from parties interested in the development of DO criteria for other provinces.

OFFICE OF NATIONAL DRUG CONTROL POLICY

Meeting of White House Task Force on Drug Use in Sport

AGENCY: Office of National Drug Control Policy.

ACTION: Notice of Meeting of White House Task Force on Drug Use in Sport on December 7, 2000 in Salt Lake City, Utah.

SUMMARY: A meeting of the White House Task Force on Drug Use in Sport will be held on Thursday, December 7, 2000 in Salt Lake City, Utah in the Wasatch Ballroom of the Wyndham Hotel, 215 W. South Temple, 2nd Floor, Salt Lake City, Utah 84101. The meeting will commence at 8:00 a.m. on December 7th and will conclude at 12:30 p.m. The agenda will focus on two key issues: (1) How can the United States help ensure a drug free 2002 Winter Olympic Games; and (2) How can the United States most effectively reach out to young people to prevent the use of drugs in sport. There will be an opportunity for public comment from 11:10 a.m. until 11:40 on Thursday December 7, 2000.
