(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: State Court Authorities. The National Judicial Reporting Program (NJRP) is the only collection effort that provides an ability to maintain important statistics on felons convicted and sentenced in state

courts. The NJRP enables the Bureau of Justice Statistics, Federal, State, and local correctional administrators, as well as, legislators, researchers, and planners to track changes in the numbers and types of offenses and sentences felons convicted in state courts receive. The NJRP also tracks changes in the demographics, conviction type, number of charges, sentence length, and time between arrest, conviction and sentencing of felons convicted in state courts.

The public reporting burden for this collection of information is estimated to average 8.013 hours per respondent.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The burden hours have been estimated based on the following calculations: 300 Respondents $\times$ 8.013 Hours = 2,404. Therefore, the total estimated burden hours associated with this collection are 2,404.
