On May 1, 2007, the Department of Energy (DOE) received an application from DC Energy for authority to transmit electric energy from the United States to Canada as a power marketer. A final decision will be made on this application after the environmental impacts have been evaluated pursuant to the National Environmental Policy Act of 1969, and a determination is made by DOE that the proposed action will not adversely impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above and at <http://www.oe.energy.gov/304.htm>.

Title: NSPS for Sewage Sludge Treatment Plants (Renewal).

ICR Numbers: EPA ICR Number 1063.10, OMB Control Number 2060-0035.

ICR Status: This ICR is scheduled to expire on September 30, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Abstract: This Information Collection Request (ICR) renewal is being submitted for the NSPS for Sewage Sludge Treatment Plants (40 CFR part 60, subpart O), which were promulgated on February 28, 1974. These standards apply to each incinerator which combusts wastes containing more than 10 percent of sewage sludge (dry basis) produced by municipal sewage treatment plants, or each incinerator which charges more than 1000 kg (2205 lb.) per day municipal sewage sludge (dry basis), and any facility that commenced construction, modification or reconstruction after June 11, 1973. Owners and operators of facilities subject to NSPS must notify EPA of construction, reconstruction, anticipated and actual startup dates, and results of performance tests. Records of performance test results, shutdowns, and malfunctions must be maintained. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS.
