**NUCLEAR REGULATORY
COMMISSION**

[Docket No 50-391]

**Tennessee Valley Authority; Watts Bar
Nuclear Plant, Unit 2; Environmental
Assessment and Finding of No
Significant Impact**

The U.S. Nuclear Regulatory Commission (NRC) is considering extending the latest construction completion date specified in Construction Permit No. CPPR-92 issued to Tennessee Valley Authority (permittee, TVA) for the Watts Bar Nuclear Plant (WBN), Unit 2. The facility is located at the permittee's site on the west branch of the Tennessee River approximately 50 miles northeast of Chattanooga, Tennessee.

Environmental Assessment*Identification of Proposed Action*

The proposed action would extend the latest construction completion date of Construction Permit No. CPPR-92 from December 31, 2010 to March 31, 2013. The proposed action is in response to the permittee's request dated May 8, 2008. This request superseded an earlier letter dated March 6, 2008.

The proposed extension will not allow any work to be performed that is not already allowed by the existing construction permit. The extension will merely grant the permittee more time to complete construction in accordance with the previously approved construction permit.

The Need for the Proposed Action

The proposed action is needed to give the permittee adequate time to complete construction of WBN Unit 2. In a July 14, 2000 letter, TVA confirmed that
