SUPPLEMENTARY INFORMATION:

Title: 30 CFR Part 254, Oil-Spill Response Requirements for Facilities Located Seaward of the Coast Line.

OMB Control Number: 1010-0091.

Abstract: The Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990 (OPA), requires that a spill-response plan be submitted for offshore facilities prior to February 18, 1993. The OPA specifies that after that date, an offshore facility may not handle, store, or transport oil unless a plan has been submitted. Regulations at 30 CFR part 254 establish requirements for spill-response plans for oil-handling facilities seaward of the coast line, including associated pipelines.

We use the information collected under 30 CFR part 254 to determine compliance with OPA by owners/operators. Specifically, MMS needs the information to:

- Determine effectiveness of the spill-response capability of owners/operators;
- Review plans prepared under the regulations of a State and submitted to MMS to satisfy the requirements of this rule to ensure that they meet minimum requirements of OPA;
- Verify that personnel involved in oil-spill response are properly trained and familiar with the requirements of the spill response plans and to witness spill-response exercises;
- Assess the sufficiency and availability of contractor equipment and materials;
