

261.38; the general facility requirements at 40 CFR parts 264 and 265, subparts B through H; the requirements applicable to BIF units at 40 CFR part 266; and the RCRA Part B permit application and modification requirements at 40 CFR part 270. Examples of paperwork collected under these requirements include one-time notices, certifications, waste analysis data, inspection and monitoring records, plans reports, RCRA Part B permit applications and modifications. The responses to the collection of information are mandatory. EPA needs this information for the proper implementation, compliance tracking, and fulfillment of the congressionally delegated mandate under RCRA to protect public health and the environment. EPA, however, has taken steps to minimize the burden imposed on the facilities, and ensures the confidentiality of the provided information by complying with Section 3007(b) of RCRA, Privacy Act of 1974 and OMB Circular #108. Based on information from the EPA Regions, we estimated at last renewal of this ICR that 91 BIF facilities are subject to the RCRA hazardous waste program. Of these, we estimate that 32 BIFs are currently under interim status and the remaining 59 are in permitted status. This renewal takes into account the current universe of the BIF facilities, and the current regulations applicable to them based on the amendments made to date.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2,626 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 91.

Frequency of response: Annual.

Estimated total average number of responses for each respondent: 22.

Estimated total annual burden hours: 238,997 hours.

Estimated total annual costs: \$33,665,000, includes \$7,855,000 annualized capital/startup cost, \$9,880,000 annual O&M costs and \$15,930,000 annual labor costs.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: October 6, 2008.

Title: NESHAP Emissions for Polyether Polyol Production (Renewal)
ICR Numbers: EPA ICR Number 1811.06, OMB Control Number 2060-0415.

ICR Status: This ICR is scheduled to expire on January 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emissions Standards for Hazardous Air Pollutants for Polyether Polyols Production, (40 CFR part 63 subpart PPP) was proposed on June 1, 1999 and published January 30, 2002. These regulations apply to new and existing facilities that engage in the manufacture of polyether polyols (which also include polyether mono-ols) and emit hazardous air pollutants (HAP).

Owners or operators of polyether polyols production facilities to which this regulation is applicable must choose one of the compliance options described in the rule or install and monitor a specific control system that reduces HAP emissions to the compliance level. Compliance is assumed through initial performance testing or design analysis, as appropriate, and ongoing compliance is demonstrated through parametric monitoring. The respondents are also subject to sections of 40 CFR part 63 subpart A.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 72 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize

technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of facilities that manufacture polyether polyols.

Estimated Number of Respondents: 82.

Frequency of Response: Initially, and semi-annually.

Estimated Total Annual Hour Burden: 13,042.

Estimated Total Annual Cost: \$1,243,954, which includes \$1,040,942 in annual labor costs, \$203,012 in annualized capital costs, and \$0 for O&M costs.

Changes in the Estimates: The decrease in burden is due to an Agency correction in the number of responses from 190 to 180 per year.

Dated: October 16, 2008.

Sara Hisel-McCoy,

Director, Collection Strategies Division.
