

determined not to be cost effective or in the public interest to attempt to list these programs. In addition, NIH could not be certain that every federal program would be included as many federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the Catalog of Federal Domestic Assistance are affected.

Dated: October 19, 2001.

Ruth L. Kirschstein,

Acting Director, National Institutes of Health.

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection

of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Methamphetamine Abuse Treatment—Special Studies (MAT-SS)

New—The Methamphetamine Abuse Treatment—Special Studies (MAT-SS) project is a family of coordinated studies funded by SAMHSA's Center for Substance Abuse Treatment (CSAT) that will serve as a follow-up to the CSAT Methamphetamine Treatment Project (MTP). The MTP was conducted to compare the outcomes of the Matrix Model of methamphetamine treatment with Treatment-as-Usual in and across multiple treatment sites, and to assess the feasibility and outcomes generated by a technology transfer of the Matrix Model. Participants included 150 methamphetamine dependent clients recruited at each treatment site who were randomly assigned to one of the treatment conditions. Participants, diverse in demographic characteristics, and in individual and environmental circumstances, were evaluated at admission, weekly during treatment, at discharge, and at 6 and 12 months after treatment admission. Participating treatment sites include eight programs in seven geographical areas: Billings, Montana; Honolulu, Hawaii; and Concord, Costa Mesa, San Diego, Hayward, and San Mateo, California.

The family of studies included in the MAT-S project will address diverse issues associated with the phenomena of methamphetamine dependence. The Multi-Year Methamphetamine Treatment Follow-up Study will assess the long-term outcome and functioning of individuals who previously participated in treatment for methamphetamine dependence. The study will utilize a 36-month post-

intake, face-to-face, one-on-one structured interview. Multiple measures typically utilized in substance abuse research with established psychometric properties will be employed to assess the longitudinal course of methamphetamine dependence and its consequences. A randomly selected sample of follow-up participants will also be interviewed to collect medical, neurological, and psychiatric data. The Adherence to Manualized Treatment Protocols Over Time Study will assess issues associated with the adoption of the Matrix Model of treatment and/or Matrix treatment components after the formal MTP study period has ended, specifically addressing adherence to the manualized treatment protocol. Interviews of both staff and clients will utilize a semi-structured, face-to-face format. Finally, The Cost Analysis of Outpatient Methamphetamine Treatment Study will evaluate the cost effectiveness of both the Matrix and Treatment-as-Usual treatment conditions in each treatment site. Two data collection methods will be utilized and to collect information from both administrator interviews and review of administrative and financial records.

The conceptual underpinning of the MAT-SS project is a recognition by SAMHSA and leading experts in the field that escalating methamphetamine abuse nationwide necessitates a longitudinally focused investigation addressing the process, nature, and consequences of methamphetamine dependence. The overall goals of the MAT-SS project are to document the longitudinal process of addiction and recovery in methamphetamine-dependent individuals, ascertain the feasibility and success of implementing a manualized treatment protocol in community-based treatment settings, and evaluate the cost effectiveness of various treatments for methamphetamine dependence. The following table summarizes the burden for this project.

	Number of respondents	Responses per respondent	Hours per response	Total burden hours
Follow-up client interviews	1,016	1	3.0	3,048
Follow-up interviews/exams	508	1	2	1,016
Treatment adherence interviews	144	2	1.5	432
Cost analysis interviews	20	2	1.5	50
Cost analysis document review	8	2	6	96
Total	1,188			4,642
Annual average	396			1,547

Send comments to Nancy Pearce, SAMHSA Reports Clearance Officer,

Room 16-105, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

Written comments should be received within 60 days of this notice.

Dated: November 8, 2001.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Fiscal Year (FY) 2002 Funding Opportunities

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice of funding availability.

SUMMARY: The Substance Abuse and Mental Health Services Administration (SAMHSA) Center for Substance Abuse Treatment (CSAT) announces the

availability of FY 2002 funds for grants for the following activity. This notice is not a complete description of the activity; potential applicants *must* obtain a copy of the Guidance for Applicants (GFA), including Part I, Recovery Community Organization Development and Community Mobilization Program, and Part II, General Policies and Procedures Applicable to all SAMHSA Applications for Discretionary Grants and Cooperative Agreements, before preparing and submitting an application.

Activity	Application deadline	Est. funds FY 2002	Est. number of awards	Project Period (in year)
Recovery Community Organization Mobilization Program				
Track I	January 10, 2002	\$900,000	4-5	5
Track II	January 10, 2002	1,100,000	4	3

The actual amount available for the award may vary, depending on unanticipated program requirements and the number and quality of applications received. FY 2002 funds for the activity discussed in this announcement were appropriated by the Congress under Public Law No. 106-310. SAMHSA's policies and procedures for peer review and Advisory Council review of grant and cooperative agreement applications were published in the **Federal Register** (Vol. 58, No. 126) on July 2, 1993.

General Instructions

Applicants must use application form PHS 5161-1 (Rev. 7/00). The application kit contains the two-part application materials (complete programmatic guidance and instructions for preparing and submitting applications), the PHS 5161-1 which includes Standard Form 424 (Face Page), and other documentation and forms. Application kits may be obtained from: National Clearinghouse for Alcohol and Drug Information (NCADI), PO Box 2345, Rockville, MD 20847-2345, Telephone: 1-800-729-6686.

The PHS 5161-1 application form and the full text of the activity are also available electronically via SAMHSA's World Wide Web Home Page: <http://www.samhsa.gov>.

When requesting an application kit, the applicant must specify the particular activity for which detailed information is desired. All information necessary to apply, including where to submit applications and application deadline

instructions, are included in the application kit.

Purpose: The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment (CSAT) announces the availability of Fiscal Year 2002 funds for grants to foster the participation of people in recovery, their family members, and other allies (the recovery community) in the public dialogue about addiction, treatment, and recovery, and to build their capacity to identify, develop, and support treatment and recovery policies, systems, and services that meet their needs as they define them. Funded projects must document promising approaches in recovery community organizing that can be shared with others attempting similar efforts throughout the Nation. Based on past experience, CSAT believes that successful projects usually include a combination of the following organizing activities: encouraging and facilitating participation by people in recovery and their family members in the planning, design, delivery, and evaluation of addiction treatment and recovery policies, systems, and services at the local, State, regional, and national levels; promoting linkages among recovery community members, and between the recovery community and service delivery systems; and developing and conducting public education to help reduce the stigma associated with addiction, treatment, and recovery.

Applications for two separate Tracks will be funded under the RCSP. Track I solicits applications for new recovery

community organizing initiatives, and Track II is designed to enable existing organizations that have demonstrated their capacity in recovery community organizing to expand or intensify their current program, or to replicate their promising program model in another setting.

Eligibility: Applicants may be domestic private nonprofit organizations, such as community-based organizations, universities, faith-based organizations, or units of State or local governments or Indian Tribes and tribal organizations. Consortia comprised of various types of eligible organizations are permitted.

For both Tracks, applications may be from: (a) Recovery community organizations (RCOs), which are organizations comprised of and led by recovery community members; or (b) facilitating organizations, which though themselves not necessarily comprised of recovery community members, will either enable the formation of an independent RCO or will develop some other organizational structure within which to carry out recovery community organizing. Organizations that were funded, either directly or indirectly, under CSAT's 1998 RCSP GFA are not eligible to apply for awards in Track I. Organizations that were funded, either directly or indirectly, under the 2001 RCSP GFA are not eligible to apply for awards in either Track.

Availability of Funds: Approximately \$900,000 will be available to fund approximately 4-5 grants in Track I. The award for a Track I grant is expected to range from \$175,000 to
