required by the Paperwork Reduction Act (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before February 11, 2025. If you anticipate that you will be submitting comments but find it difficult to do so within the time period allowed by this notice, you should advise the contacts below as soon as possible.

Number of Respondents and Responses: 4,186 respondents; 207,089 responses.

Estimated Time per Response: 0.5 hour–10 hours.

Frequency of Response: On occasion reporting requirement and third-party disclosure requirement.

Needs and Uses: This information facilitates efficient interaction between premises owners and local exchange carriers (LECs) regarding the placement of the demarcation point, which marks the end of wiring under control of the LEC and the beginning of wiring under the control of the premises owner or subscriber. The demarcation point is a critical point of interconnection where competitive LECs can gain access to the inside wiring of the building to provide service to customers in the building. This collection also helps ensure that fixed wireless antennas covered by the OTARD rule comply with the Commission's limits on radiofrequency exposure and provides the Commission with information on the state of the market. In short, this collection helps foster competition in local telecommunications markets by ensuring that competing telecommunications providers can provide services to customers in multiple tenant environments.

SUPPLEMENTARY INFORMATION: The FDIC is requesting OMB approval for the following new collection of information:

1. *Title:* 2025 FDIC Survey of Deposit Insurance Awareness.

OMB Number: 3064–NEW.

Affected Public: Individual members of the public.

Burden Estimate:

Frequency of Response: Once.

Estimated Number of Respondents: 6,500.

Average Time per Response: 4 minutes.

Estimated Total Annual Burden: 26,000 minutes (434 hours).

General Description of Collection: The FDIC proposes to field a statistical consumer survey to assess awareness of the FDIC and of deposit insurance. Survey results will inform FDIC public awareness, communication, education, outreach and research efforts regarding deposit insurance, and will identify information and awareness gaps in terms of content and demographic segments. Research questions will cover consumers' knowledge of, attitudes towards, and behaviors regarding deposit insurance. The proposed 2025

FDIC Survey of Deposit Insurance Awareness is intended to collect information regarding what consumers know about deposit insurance and how they learn it, what consumers think about deposit insurance and banking, and how this information shapes financial decisions. The survey will inform research and programmatic efforts to improve consumers' awareness and understanding of deposit insurance, to help fulfill the agency's mission of maintaining stability and public confidence in the nation's financial system.

The survey will assess consumers' awareness and knowledge of the FDIC and its role regarding deposit insurance, including their understanding of the types of institutions and situations where deposit insurance applies, and the sources they use to learn about deposit insurance. The survey will also assess whether deposit insurance impacts consumers' confidence in the banking system and perceptions and use of bank and nonbank financial services, including their likelihood to consider deposit insurance when making decisions about financial products and services. Finally, the survey will collect background information regarding consumers' use of some bank and nonbank products, and the types of institutions they use to save or store money inside and outside of the banking system.

The survey will be conducted in spring 2025 as part of Porter Novelli's PN Styles survey, using the IPSOS Knowledge Panel, a probability-based online panel in the US. PN Styles is a large-scale, representative survey of U.S. adults that tracks consumer attitudes and behaviors. Interested members of the public may obtain a copy of the proposed survey questionnaire on the following web page: <https://www.fdic.gov/federal-register-publications/fdic-deposit-insurance-awareness-survey>.
