

located at 74 Harbor Road, Cold Spring Harbor, operates a pumpout. The pumpout is available 24 hours a day beginning May 1 through October 31 and is self-service. No fee is charged for the use of the pumpout. This facility is located outside of the proposed NDA and is not included as one of the ten landside facility. The facility has been included in the application for information purposes.

Vessel waste generated from the pumpout facilities located at West Shore Marina, Knutson's West Marina, Huntington Yacht Club, Britannia Yacht and Seymour's are hauled by privately operated waste haulers. The Town of Huntington provides waste hauling service to the municipally owned pumpout facilities located at Cold Spring Harbor, Halesite Marina, Mill Dam Marina, Woodbine Marina, and Gold Star Mooring and Launch Service. All hauled waste from the pumpout facilities is discharged into and treated at the Town of Huntington sewage treatment plant (SPDES Permit No. NY0021342) located on Creek Road in Halesite.

According to the State's petition, the maximum daily vessel population for the waters of Greater Huntington-Northport Bay Complex is approximately 3200 vessels which are docked or moored with an additional 700 vessels accessing the greater Harbor from boat ramps. An inventory was developed including the number of recreational, commercial and estimated transient vessels that occupy or traverse the greater bay complex. This estimate is based on (1) vessels (approximately 1600 vessels) docked or moored (including transients) in the proposed NDA, (2) vessels (approximately 1600 vessels) docked or moored (including transients) in the existing Huntington/Lloyd Harbor NDA and (3) vessels (approximately 700 vessels) which use the boat ramps in the Greater Bay Complex. While approximately one-third to one-half of the vessels operating in the Greater Bay Complex are not equipped with a MSD, the ratio of boats to pumpout facilities has been based on the total number of vessels which could be expected. With ten shore-side pumpout facilities and two pumpout facilities available to boaters, the ratio of docked or moored boats (including transients) is approximately 267 vessels per pumpout. If we include the vessels (approximately 700) using the available boat ramps, the ratio increase to 325 vessels per pumpout. Standard guidelines refer to acceptable ratios failing in the range of 300 to 600 vessels per pumpout.

The EPA hereby makes a tentative affirmative determination that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the Greater Huntington-Northport Bay Complex in the county of Suffolk, New York. A final determination on this matter will be made following the 30-day period for public comment and will result in a New York State prohibition of any sewage discharges from vessels in Greater Huntington-Northport Bay Complex.

Comments and views regarding this petition and EPA's tentative determination may be filed on or before May 3, 2000. Comments or requests for information or copies of the applicant's petition should be addressed to Walter E. Andrews, U.S. Environmental Protection Agency, Region II, Water Programs Branch, 290 Broadway, 24th Floor, New York, New York, 10007-1866. Telephone: (212) 637-3880.

Dated: March 16, 2000.

Jeanne M. Fox,

Regional Administrator, Region II.

FEDERAL TRADE COMMISSION

[File No. 981 0395]

Abbott Laboratories, and Geneva Pharmaceuticals, Inc.; Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreements.

SUMMARY: The consent agreements in these two matters settle alleged violations of federal law prohibiting unfair or deceptive acts or practices or unfair methods of competition. The attached Analysis to Aid Public Comment describes both the allegations in the draft complaint that accompanies the consent agreements and the terms of the consent orders—embodied in the consent agreements—that would settle these allegations.
