

water elevation while in the closed position. These bridges operate in accordance with 33 CFR 117.1059(c). The SR 529 highway bridges over Steamboat Slough at mile 1.1 and 1.2 provides 10 feet of vertical clearance above mean high water elevation while in the closed position. These bridges operate in accordance with 33 CFR 117.1059(g). This deviation allows the SR 529 bridges crossing the Snohomish River and Steamboat Slough to remain in the closed-to navigation position, and need not open for maritime traffic, from 7:30 a.m. to 11 a.m. on April 9, 2017. The bridges shall operate in accordance to 33 CFR 117.1059 at all other times.

Vessels able to pass through the bridges in the closed-to-navigation position may do so at any time. The bridges will be required to open, if needed, for vessels engaged in emergency response operations during this closure period. Waterway usage on this part of the Snohomish River and Steamboat Slough includes vessels ranging from commercial tug and barge to small pleasure craft. An alternate route for vessels to pass is available through Ebey Slough and Union Slough near the entrance of Steamboat Slough at high tide. A request for comment with any objections to this deviation was advertised in the Local Notice to Mariners, and none was received. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridges so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridges must return to their regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: March 28, 2017.
