Affected entities: Entities potentially affected by this action are State regulatory agencies.

Title: State Input to the EPA Innovation Catalogue.

Abstract: The Innovation Catalogue is a searchable Web-based database containing over 500 innovative projects from across the Environmental Protection Agency (EPA), and is hosted on the EPA's Intranet. The Innovation Catalogue is one of the Agency's tools for communicating and fostering the transfer of our innovation experience. It has been used to identify pollution prevention case study candidates, and has also proven to be a valuable means of providing quarterly reports on the Agency's innovation activities and accomplishments to the Administrator. The Innovation Catalogue has expanded EPA's professional tool box for solving environmental problems innovatively.

Thus far, the Catalogue has only been accessible to EPA staff for viewing and editing via a password-protected Intranet site. However, the Agency is proposing to make the Catalogue accessible to State government staff. State staff who are interested in accessing the database could request a password, after which they would be granted access to the Catalogue. Once registered, they would be given viewing and submittal access. State officials with passwords would be able to contribute innovations of their own for publication in the database, and in addition, they would be granted editing access to projects that they submitted.

State involvement with the Innovation Catalogue would be voluntary. EPA would work with State organizations and State trade associations, such as the Environmental Council of States, to publicize the availability of the database. EPA would encourage voluntary State involvement in the database by asking state environmental agencies to contribute their own innovative projects for consideration and publication in the

Innovation Catalogue. State staffers would input their innovative projects directly into the Catalogue using a predefined template. State input into the Catalogue would enrich the database with a larger and more diverse range of innovative projects. By sharing information on innovative approaches between the EPA and its State partners, both EPA and the States would benefit from using more cost-effective and creative techniques of environmental protection.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic,

mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: EPA estimates that each State will submit 15 entries to the Innovation Catalogue per year. We have derived this estimate from our discussions with Innovation Coordinators in the Regions. Each entry will take approximately one hour. We anticipate that each State will revise and update its entry twice a year, which will also take an hour. Average State salaries were obtained from the the Bureau of Labor Statistics' *Employer Costs for Employee Compensation* (ECEC) data from December 2002. The calculations summarizing these estimates follow in the table below.

TABLE 1.1.—SUMMARY OF ANNUALIZED RESPONDENT BURDEN, JANUARY 1, 2004–DECEMBER 31, 2007

	Facility/state burden hours ¹	Facility burden cost ²	Total burden hours ³	Total burden cost
State Submissions to the Catalogue				
New Submissions for Consideration	30	\$37.47	1500	\$56,205.00
Revising Published Submissions	30	37.47	1500	56,205.00
Summary:				
Total Respondent Burden, 2004–2007	180	37.47	9000	337,230.00
Annualized Total Respondent Burden	60	37.47	3000	112,410.00

¹ EPA estimates burden hours by assuming each State will submit 15 new entries per year, with each new submission requiring 2 hours. EPA estimates that each State will submit a revision of each submission every six months, and revisions will only require 1 hour.

² EPA estimates hourly non-EPA labor rates from several sources. For State Government and Respondent wages, EPA uses the Bureau of Labor Statistics' *Employer Costs for Employee Compensation* (ECEC) data from December 2002 (<http://www.bls.gov/news.release/ecec.t04.htm> and <http://www.bls.gov/news.release/ecec.t12.htm>, respectively). Consistent with the Office of Management and Budget's 1999 guidance *Estimating Paperwork Burden* (<http://www.whitehouse.gov/omb/fedreg/5cfr1320.html>), EPA uses an adjusted labor rate reflective of benefits and overhead costs.

³ Calculated by multiplying the Facility Burden Hours by the Number of Facilities/States.

⁴ Calculated by multiplying the Total Burden Hours by the Facility Burden Cost.
